THE MEASURE OF A PRO™

www.STANLEYWORKS.SE DK | NO FI

A STORY BEHIND EVERY TOOL

Solid, tried and true. For those willing to get their hands dirty to raise the bar. Because the measure of a pro is the work they leave behind. Their legacy is every project completed until they break ground and build what's next. Our legacy? That's simple. It's on the hip and in the hand of every Pro since 1843.

KNIVES

Rely on STANLEY® for utility knives, pocket knives, replacement blades, snap-off knives, safety knives, and specialty knives for a variety of cutting jobs from floor to roof and wherever razor-sharp performance is required.

KNIFE INFORMATION

THE BEST KNIFE MEETS YOUR NEEDS

We now offer the most comprehensive range of fixed, retractable, and snap-off knifes and blades, with innovative features that meet the needs of professional contractors and craftsmen.

FIXED BLADE KNIFES

Fits all STANLEY replaceable blades. These are intended for the toughest applications. Although it is a fixed leaf, the majority of STANLEY knives include a quick blade change system.

SAFETY KNIVES

A range of safe cutting solutions.
Safety above all!

SNAP-OFF KNIFES 25, 18 & 9 mm

Ideal in situations where residues stick to the blade.
The snap-off blade provides consistently sharp edges, but is also strong and thick enough to withstand heavy pressure without breaking the blade.

CRAFT, SPORTS, POCKET KNIVES

A fantastic range. Handy pocket, hobby and sports knives, ideal for many types of tasks.

RETRACTABLE UTILITY KNIFES

Suitable for most replaceable blades. These offer the same performance as the fixed blade models and the blade retracts safely into the handle when the blade is not in use.

CHANGING THE BLADE

Quickly and without extra tools,
for most STANLEY knives.

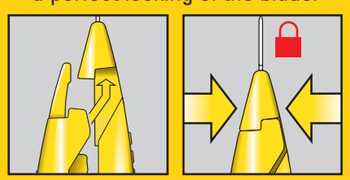

FAST BLADE CHANGE SYSTEM

By the simple push of a button
can the blade be changed.

INTERLOCK SYSTEM

Exclusive STANLEY lock system ensures
a perfect locking of the blade.

BLADE LOCKING SYSTEM WITH INTERLOCK BLADE

This allows the blade, even under great force, to
not pushed upwards.

RETRACTABLE BLADE KNIFES

STANLEY® FATMAX® PRO TWIN BLADE KNIFE

- Ergonomically shaped knife with 2 different blades
- Extra safety: while cutting with 1 blade, the other cannot be extended
- Quick blade change system by the simple push of a button
- Interlock nose locking system for greater safety during cuttingStorage space for 5 Replacement blades
- Suitable for all standard STANLEY® Replacement blades

FIXED BLADE KNIFES

STANLEY® FATMAX® HEAVY-DUTY TRADE KNIFE

REDESIGNED NOSE
Delivers outstanding cut accuracy and ensures minimal blade wobble. The magnetic nose holds the blade firmly in place during replacement

HARDENED STEEL BLADE HOLDERS
Withstands intensive daily use and will not wear

QUICK-RELEASE THUMB WHEEL
Course-threaded, quick-release thumb wheel allows fast, simple blade changes

INTEGRAL BLADE STORAGE
Onboard storage for 10 blades with magnetic blade retention, suitable for a full day of cutting

OPTIMISED LINEAR DESIGN
For strong, clean cuts in extended applications and maximum blade contact on materials

ERGONOMIC DESIGN
Grip zones and flare on knife tail for maximum control when making longer cuts

HINGED BODY
Innovative pin-hinged body for easy blade access

Available as CDU unit

Including holster

MAGNETIC BLADE ONBOARD STORAGE
For up to 10 blades

HINGED BODY
For easy blade change

TWO COLOR OPTION
For application-specific tasks

STHT0-10194	Rotary Cutterx 45 mm	X	4	3 253560 101947	

ALL PURPOSE KNIFE - STAINLESS STEEL BLADE

- 1.5mm stainless steel blade
- A better choice for use around water, especially salt water
- Blade length 90mm
- Knife blades hardened to 60 HRC - for added durability and life
- Holster with belt clip for convenient knife transport
- Soft grip design for comfortable extended heavy duty use
- Ground and hand sharpened - for extended first cut sharpness

CODE	DESCRIPTION				PRICE
0-10-232	All purpose Knife - Stainless steel			3253560102326	

REPLACEMENT BLADES HOBBY/SPORT

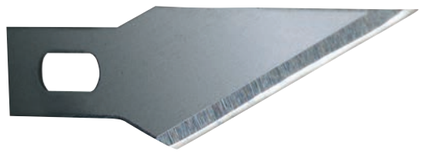

REPLACEMENT SLIM KNIFE BLADE 5901

- Knife with straight cutting edge for crafts and model making
- Thickness 0.63mm
- Length 60mm
- Suitable for 0-10-598

CODE	DESCRIPTION			PRICE
0-11-221	Replacement Slim Knife Blade 5901 - 3 pcs/card	X	10	
1-11-221	Replacement Slim Knife Blade 5901 - box 50	-	2	

REPLACEMENT BLADE HOBBY KNIVES 10-401

- Knife with long oblique cutting edge for fine carving such as illustrations, inlays and veneers
- Hardened and tempered steel for longer life
- Length 45mm
- Suitable for Hobby knife 10-401

CODE	DESCRIPTION			PRICE
0-11-411	Replacement blade Hobby Knives 10-401 - 5 pcs/card	X	10	

GLASS SCRAPERS

GLASS SCRAPER 2-SIDED

- 0-28-631 suitable for 0-28-616
- 0-28-290 suitable for 0-28-617

MEASURING & LAYOUT TOOLS

Precision, our mission since 1854.

Since 1843 STANLEY® tools have been on the belt and in the hands of professional contractors and accomplished homeowners. Synonymous with quality, reliability, innovation, and value, STANLEY is the first name in tape measures and trusted worldwide for accuracy and dependability.

STANLEY® tape measures, levels and layout tools deliver the features needed for fast & accurate measurements.

THE IMPORTANCE OF THE END HOOK

REGULAR END HOOK

Extendable end hook with true zero position for accurate internal and external measurements.

VERSATILE END HOOK

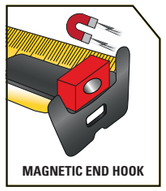

Slightly larger than a regular end hook, sticking out on all edges. A versatile end hook, easily grabs behind building materials from the top, bottom and sides, allowing for easy measurement.

SPECIAL END HOOKS

DETACHABLE END HOOK

Some jobs require a small and precise hook, while others require a large versatile hook. The detachable hook offers all possibilities.

MAGNETIC END HOOK

Useful when measuring metal objects.

PERFORMANCE YOU CAN MEASURE

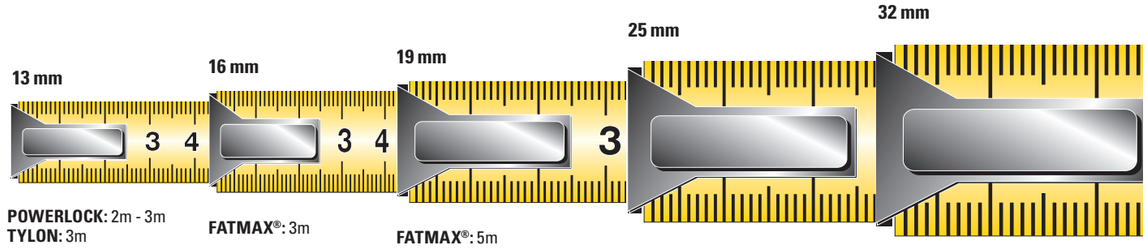

This tape measure is the strongest and most compact tape from STANLEY. Our patented twin-core™ technology provides stand-out of 4m - a tape in a compact body with a convenient design.

HALF CLOSED HOUSING
Compact
Easy to maintain

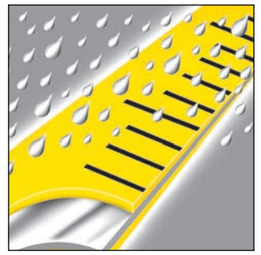

CLOSED HOUSING
Compact
Measuring tape is protected

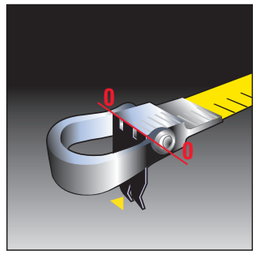

MABOLON LONG TAPES

Carbon steel ribbon, hardened and tempered MABOLON protective polyamide layer guarantees exceptional resistance to abrasion. Virtually unbreakable under normal use.

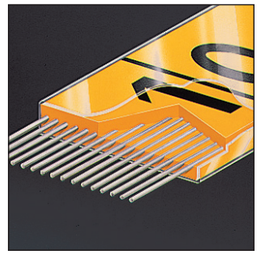

STAINLESS STEEL MEASURING TAPE

Available up to 9.5 mm wide. Resistant to abrasion, with maximum corrosion protection. anti-corrosion.

FOLDABLE END HOOK

Hardened steel hook opens to 90° with the zero point on the inside of the hook. Barbs provide a non-slip grip on most materials.

FIBERGLASS MEASURING TAPE

Fiberglass measuring tape, very resistant to stretching. Markings protected by a unique transparent coating. Smooth and washable. Does not conduct electricity.

FIBERGLASS MEASURING TAPE – GRADATION EVERY 2 MM

STAINLESS STEEL MEASURING TAPE – GRADE EVERY 1 MM

EUROPEAN STANDARDS FOR ACCURACY

ALLOWED TOLERANCES

Accuracy class II

Accuracy class III

10m	20m	30m	50m	100m
2,1mm	4,3mm	6,3mm	10,3mm	20,3mm
4,6mm	8,6mm	12,6mm	20,6mm	40,6mm

All STANLEY tape measures sold in the Nordics are compliant to European accuracy standards.

Example: for a 20m class II long tape measure, the tolerance allowed is 4.3mm over the entire length.

LONG TAPES

LONG TAPE MASTER II

- Ergonomic moulded handle
- Open chrome-plated copper frame
- Tape and handle interchangeable for right handed or left handed users

2-34-795	Long tape Fiberglass 60m - 12.7 mm - open box	X	2	3 253562 347954	

LONG TAPE FIBERGLASS CLOSED CABINET

- ABS structure with high impact capacity for use in harsh working conditions
- Reinforced fiberglass tape - reduces elasticity and increases accuracy
- Highly visible yellow tape with 2 mm graduations for precise measurements
- Tape: corrosion resistant, with UV protection, non-conductive and with a washable PVC coating for extra durability
- Perforated at the back for easier cleaning of the tape
- Accuracy: Class III

THE MEASURE OF A PRO™

PRACTICAL INFORMATION

OUR ASSORTMENT

MULTIUSE SQUARE
This is an important part in the carpenter's toolbox. Can be used as a try and mitre square, depth or height gauge and spirit level

SLIDING BEVEL
Intended for repeating and marking angles, but the bevel must be used in conjunction with a protractor if you want to set the bevel at a specific angle.

CARPENTERS FLAT STEEL SQUARE
A very useful tool if you often need to mark large panels. Reverse reading scale and crisply embossed graduations for easy reading

MARKING GAUGE
Used for scoring lines along the length of a piece of wood parallel to the top or top edge. It is more accurate to cut or plan along a scored line than along a pen line. The marking gauge consists of a baffle plate that rubs against the top or top edge of the work and a graduated bar that contains a hardened notching pin. The spacing of the pin and striker plate is set with a steel gauge bar and the bar is locked in position with a thumbscrew.

FOLDING SQUARE
Indispensable for the large-scale layout of building profiles, foundations, tiling, paving, driveway construction and landscaping. The simple folding system makes it compact and easy to carry.

CHALK LINE
Used for marking straight lines on the floor, wall or ceiling. It is an important part in the toolbox of contractors and plumbers for the layout of walls, floors etc.

MARKING OUT TOOLS

STANLEY® DIGITAL ANGLE LEVEL - 40CM

- Digital angle level with illuminated LCD screen
- Measurements from 0° to 225°
- 2 vials: 1 horizontal and 1 vertical
- Aluminium profile
- Accuracy in digital measurements: 0.1°
- Supplied with 2× AAA batteries
- Supplied with waterproof bag
- 360° readability - text on screen rotates with the device
- HOLD function
- Memory
- Calibration function
- Suitable for measuring double miter angles (via memory function)

LEVELS

Around the jobsite, in your garage, or just for hanging pictures, you need a level tool you can count on to keep your project level and functional. We offer a wide selection of levels, including laser, I-beam, torpedo, box beam levels, and others.

LEVELS
THE RIGHT LEVEL FOR THE JOB

The longer the better, particularly if the surface to be levelled is not perfectly true. A shorter level will tend to follow the contour of the surface, whereas a longer level will even out the undulations. For bricklaying and general builders the best choice is the 1200mm and for concreters the 1800mm would be a good choice. Finish carpenters may prefer a lighter box or I beam section body in a length of 600 or 900mm, ideal for fi tting kitchen furniture and general trim work.

STANLEY® XTREME BOXBEAM LEVELS

NEW

MAGNETIC OPTION

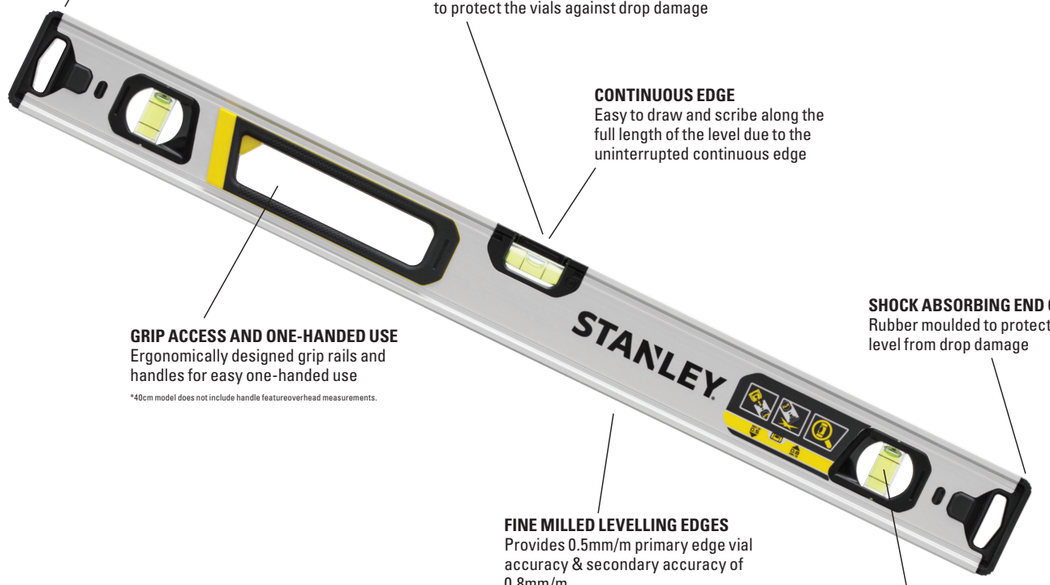

REMOVABLE END CAPS
Allows end user accuracy and precision due to easier 90° angle/corner access

SECURED VIAL TECHNOLOGY
Full frame vial carrier design engineered to protect the vials against drop damage

CONTINUOUS EDGE
Easy to draw and scribe along the full length of the level due to the uninterrupted continuous edge

GRIP ACCESS AND ONE-HANDED USE
Ergonomically designed grip rails and handles for easy one-handed use

*40cm model does not include handle featureoverhead measurements.

SHOCK ABSORBING END CAPS
Rubber moulded to protect the level from drop damage

FINE MILLED LEVELLING EDGES
Provides 0.5mm/m primary edge vial accuracy & secondary accuracy of 0.8mm/m

MAGNIFIED SOLID BLOCK PLUMB VIALS
90% larger plumb vials for better visibility

THE RIGHT LEVEL FOR THE JOB

SELECT THE RIGHT LENGTH OF LEVEL

The longer the better, particularly if the surface to be levelled is not perfectly true. A shorter level will tend to follow the contour of the surface, whereas a longer level will even out the undulations. For bricklaying and general builders the best choice is the 1200mm FatMax Xtreme and for concreters the 1800mm would be a good choice. Finish carpenters may prefer a lighter box or I beam section body in a length of 600 or 900mm, ideal for fi tting kitchen furniture and general trim work.

BOX BEAM LEVELS

The box section provides the ultimate in terms of overall strength and performance. They are fi tted with solid block acrylic vials that have been machined to exacting tolerances to ensure that the movement of the bubble is smooth and comes to rest quickly. A small magnifying area in the centre makes reading the position of the vial easier.

ADJUSTABLE VIAL LEVEL

The rotating vial can be adjusted to between 0° and 90°, enabling you to set angles for roofing or drainage pipes etc.

'I' BEAM LEVELS

I beam or girder section levels offer a lighter weight alternative, fi tted with tubular 360° vials.

TORPEDO LEVEL

The FatMax® Xtreme Torpedo Level has a V groove machined in the magnetic base, which allows it to fi t fi rmly on pipe work, ideal for scaffolders, plus it is also perfect for installing machinery, air conditioning ducting or shelving.

TORPEDO	CLASSIC BOX	BOX BEAM	I BEAM	DIGITAL

STANLEY®LEVEL I-BEAM

- I profile
- Durable heavy-duty aluminum support bar
- 3 tubular vials: 1× vertical, 1× horizontal, 1× 180° adjustable (double tick marks from 0° to 90° and in 10 increments)
- Thanks to shock-absorbing end pieces, accuracy is preserved - even if the Level falls
- Accuracy: 1.5mm/m

Not in the Nordic assortment - special order required

STANLEY® I-BEAM LEVEL

- V-groove in work surface, for round tube applications
- Aluminum construction with yellow powder coating: surface protection
- 3 vials (Ø12 mm diameter): 180°, 90° and 45° (except 30cm version: 2 vials: 180° and 90°)
- Dragonflies protected with plastic
- Continuous work surface with window at the top
- Accuracy: 2.0mm/m
- Plastic end pieces

FATMAX® PRO BOX TORPEDO LEVEL

STANLEY FATMAX

- Box torpedo Level with two fixed vials and a 360° rotating vial for flexible measuring
- Oversized center vial for easier reading and increased accuracy
- Magnetic base for easier working on steel structures and scaffolding
- No-Mar rubber end caps for greater shock resistance
- Extruded aluminum housing for increased strength and reduced weight
- Accuracy: 0.5mm/m

THE STANLEY®LASER RANGE

Accurate measuement is essential for trouble free construction sites, speeding up the job and minimising waste and reworked tasks. Our aim has been to create a range of complimentary products - all built to our exacting standards - to enable professional users work quickly and accurately. That's why the STANLEY® Laser Tools range offers all the benets of durable and well engineered products with user friendly features and features designed for the professional user.

LASER DISTANCE MEASURER TLM330 - 100 M

- Smartconnect app via Bluetooth®
- Range: 0.15 - 100m
- Accuracy: 1.5mm @ 10m
- Measurements: distance - area - volume - Pythagoras
- Continuous measurement function
- Calculation function
- Fore, aft, tripod and angle measurement
- Memory function: 20 values
- Touch screen: backlit, 3 value display
- IP54 dust and water resistant
- With tilt sensor
- Auto off (30 - 60 - 300 sec.)
- Standard tripod thread 1/4"
- Functions: Distance, Area, Volume, Height, Combined Height, Continuous Distance Measurement, Continuous Height Measurement, Obstacle Distance, Triangle, Shared Height, Interval
- Ideal for architects
- Measurements per set of batteries: 5000
- Supplied with batteries 3× AAA and storage bag

STHT1-77139	Laser distance Measurer TLM165s - 50 m	X	2	3 253561 771392	125.00

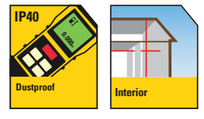

LASER DISTANCE MEASURER FLM165 - 50 M

- Measuring range of 50m with accuracy of +/- 1.5mm
- Delivers accurate distance, area, volume, Pythagorean and continuous measurements
- Calculation function (+/-)
- Metric and imperial units of measurement
- Internal rechargeable lithium-ion battery provides impressive runtime - up to 1000 readings per charge
- Internal Lithium-Ion battery can be fully charged in 2.5 hours
- Automatic power saving mode to save battery
- Easy to use, two-button operation
- Black LCD screen with clear white characters for excellent visibility, even in high ambient light
- Robust rubber-protected housing for better grip and long product life
- IP40 rating against dust and water ingress

NEW

SLM100 LASER DISTANCE MEASURER - 30M

- 30 m measuring range - suitable for a wide variety of professional measuring applications
- Black LCD screen with white characters for excellent visibility, even in high ambient light
- Two-button operation for ease of use
- On/Measure button for taking measurements and a button to change function
- Two-point measurement system - measurements can be taken from the front or back of the device for added flexibility and accuracy in various measurement applications
- Energy saving mode - device automatically turns off when inactive after 120 seconds (laser), 180 seconds (display)
- Large screen size - displays three rows of measurements on screen at any given time
- Drop test from 1 m height – shockproof

LASER DISTANCE MEASURER TLM50 - 15 M

- Range: 0.17 - 15m
- Accuracy: 3mm @ 10m
- Measurements: distance
- Continuous measurement function
- Back measurement
- Black screen with white letters - better readability
- IP54 dust and water resistant
- 1 value display on screen
- Auto off (90 sec)
- Functions: Distance, Continuous distance measurement
- Measurements per set of batteries: 3000
- Supplied with batteries 2× AAA

THE RIGHT LASER FOR EVERY JOB

THE MAIN TYPES OF STANLEY LASER LEVELS

Level

Rotating

Spot line/cross

Cross + spot line

Spot line

ARE LASERS POSSIBLY DANGEROUS?

In terms of their potential hazards, lasers are classified from 1 to 4. STANLEY lasers are classified as 1 to 2, meaning they pose little or no hazard.

Class 1 - **Does not pose a risk of biological damage.**

Class 2 - **The laser could injure a person if they stare into the beam for a long time.**

WHAT IS A LASER?

LASER stands for "Light Amplification by Stimulated Emission of Radiation". A diode is used to create a concentrated laser beam in one wavelength. The shorter the wavelength, the brighter and more visible the laser beam. STANLEY lasers have a standard wavelength of 635 nanometers, suitable for use over distances of up to 300m.

IP-CLASS

If you work in dusty and humid environments, the IP rating of the laser is also important. Some STANLEY lasers have an IP54 rating (dust resistant and splash proof) or IP66 rating (dust resistant and completely waterproof).

Corners and slopes

Straight lines

Plumb line - take a point from floor to ceiling

Horizontal/Vertical level and alignment

REPAIR UNDER WARRANTY AND CHECK SERVICE

All STANLEY laser products come with a one-year warranty. During this period, repairs under "normal" use are free of charge. For repairs under warranty, you must contact your dealer, who will send the product to STANLEY for repair. The product will then be repaired and returned to your dealer, who will in turn deliver it to you. Also follow the above procedure for out-of-warranty repairs. You will then first receive a quotation for the repair so that you can decide whether or not the repair should be carried out or not. We recommend that you have products serviced annually and calibrated every 6 months.

LEVELING FEATURES

Listed below are the common leveling functions you can perform with the STANLEY® range.

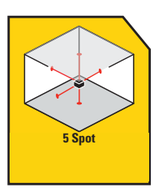

ROTATING LASERS

CROSS LINE LASERS

SPOT LASERS

360° LASERS

STANLEY® FATMAX® 35/50 M X3G GREEN BEAM MULTI-LINE LASER LEVEL

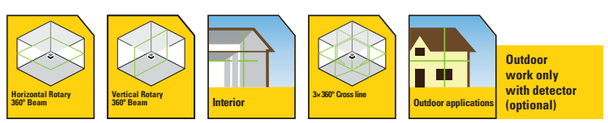

GREENLASER

- Range: 30 m and up to 50 m with detector (not included)
- Accuracy: 3mm @ 10m
- Self-levelling up to ± 4°
- Leveling Time: ≤ 3sec
- Projects 6 cross lines simultaneously, or each 360° line separately
- Reaches walls, floors and ceilings
- Pulse mode for use with detector (not included)
- IP54 dust and water resistant
- Lockable pendulum for durable transport
- Robust, shock-resistant housing
- Standard thread for tripod 1/4" and 5/8"
- Lithium Ion battery
- Supplied in sturdy PRO-STACK case (can be combined with TSTAK) with charger, multifunctional bracket, laser glasses and target card

CODE	DESCRIPTION				PRICE

LINE LASER SLL360° GREEN - 25 M

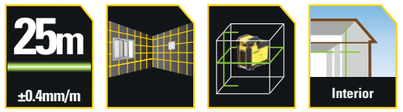

- Range: 25 m
- Accuracy: 4mm @ 10m
- Self-levelling up to ± 4°
- Leveling Time: ≤ 5sec
- Projects a self-levelling 360° line and 1 vertical line
- Convenient placement with the 360° clamp
- Lockable pendulum for durable transport
- User-friendly push button
- Large base for extra stability
- IP50 dust and water resistant
- Standard tripod thread 1/4"
- Robust housing with rubber protection
- Supplied with storage bag, 4× AA batteries and 360° clamp

CROSS LASERS

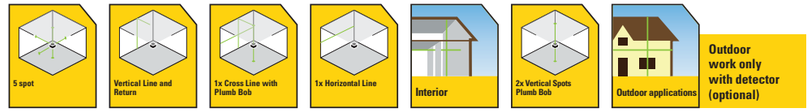

FATMAX® SCGI-P5 5 POINT + CROSS LINE LASER GREEN LI-ION

- Range line: 30 m and up to 50 m with detector (not included)
- Range point: 45 m
- Accuracy: 3 mm @ 10 m line, 6 mm @ 10 m point
- Self-levelling up to ± 4°
- Leveling Time: ≤ 5sec
- Pulse mode for use with detector (not included)
- Projects 1 horizontal and 1 vertical line + 5 individual points
- Projects self-leveling lines up to 150° thanks to continuous windows
- Magnetic base to attach to metal studs
- IP54 dust and water resistant
- Lockable pendulum for durable transport
- Standard thread for tripod 1/4" and 5/8"
- Supplied in sturdy PRO-STACK case (combinable with TSTAK) with charger, multifunctional bracket, laser glasses and target card

FATMAX® FCL-GI CROSS LINE LASER GREEN LI-ION

- Range line: 30 m and up to 50 m with detector (not included)
- Accuracy: 3mm @ 10m line
- Self-levelling up to ± 4°
- Leveling Time: ≤ 5sec
- Pulse mode for use with detector (not included)
- Projects 1 horizontal and 1 vertical line
- Projects self-leveling lines up to 150° thanks to continuous windows
- Magnetic base to attach to metal studs and fine tune
- IP54 dust and water resistant
- Lockable pendulum for durable transport
- Standard thread for tripod 1/4" and 5/8"
- Supplied in sturdy PRO-STACK case (combinable with TSTAK) with charger, multifunctional bracket and target card

STANLEY® OPTICAL LEVEL AL24GVP

- 24 x Magnification with the wire hung compensator for optimum accuracy and range
- Large, easy-to-use, precise focusing adjustments on left and right sides with friction-braked rotation
- Easy-to-read horizontal circle and Penta Prism - makes it easier to view the bubble
- Water resistant, sealed construction with sealed, dust protect leveling screws - can be used in all weathers
- Compensator lock protects unit in transit
- 5/8" x 11 threads to fit standard tripods
- Includes hard case, aluminum tripod, measuring staff

STANLEY® FATMAX® DIGITAL ROTARY LINE DETECTOR

STANLEY FATMAX

- Range/diameter: 300m/600m
- Accuracy: up to +/- 1 mm @ 40 m, 4 settings depending on the application
- Digital display window can be read from the front and back, with a large detection area +/- 50 mm to accurately detect the laser line
- Sound signal via 2 loudspeakers on the side and bottom, for correct levelling
- Memory function for receiving and holding heights at the touch of a button
- 2 strong magnets on side and top to attach to metal frames
- Rubber housing
- Dustproof and completely waterproof, IP66
- Supplied with 2× AA batteries

CODE	DESCRIPTION				PRICE

STUD SENSORS

MOISTURE METER

- Measure moisture of building material from 0.2% to 2.0%
- Measure wood moisture from 6% to 44%
- Dual measuring scale, LCD display with bar graph
- Built-in battery for checking and verification measurement
- Automatic shut-off saves battery energy
- Battery operated for on-the-go power
- Shockproof housing
- Replaceable threaded probes
- Convenient pocket-sized device
- Complete with protective cover, including 3× CR-2-32 button batteries

CODE	DESCRIPTION				PRICE
0-77-030	moisture meter	X	2	3 253560 770303	

INTELLILASER PRO

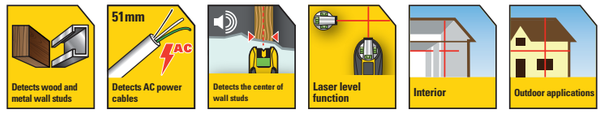

- Multi-Line Laser with wall studs - and alternating current detector
- 6 m working range
- Automatic calibration
- Detects wood and metal stud edges up to 38mm depth and AC cables up to 51mm depth
- 180° rotatable laser head for vertical and horizontal levelling
- Audible alarm to indicate stud edge
- LCD backlight to see the center of the stud
- Supplied without batteries

CODE	DESCRIPTION				PRICE
0-77-260*	Intellilaser Pro	X	2	3 253560 775001	

**Not in the Nordic assortment - special order required*

FATMAX® STUD SENSOR S300

STANLEY FATMAX

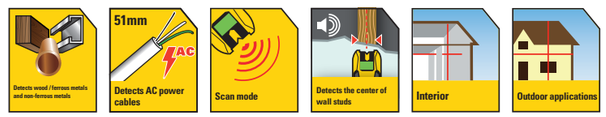

- Detects wood and metal studs up to 38mm
- LCD display with center detector Audible/visual warning for connected AC wires
- Detects live AC wires up to 51mm
- Automatic calibration
- Soft-grip design
- Marking slot to mark the center
- Features a scan mode for accurate detection of ferrous metal to 75mm depth and 38mm for copper
- Extended model with LCD backlight for easy readability even in low light.
- LCD display with center detector
- Supplied without batteries

*ferrous metals only in scan mode

CODE	DESCRIPTION				PRICE
FMHT0-77407	FATMAX Stud Sensor S300	-	2	3 253560 774073	

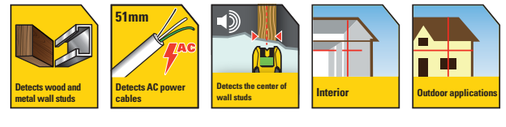

STUD SENSOR S200

- Compact and easy to use
- Detects wood/metal studs up to 19mm
- LCD display with center detector
- Audible/visual warning for connected AC wires
- Marker channel to mark the edge of the structure
- Automatic calibration
- Soft grip
- Supplied without batteries

CODE	DESCRIPTION				PRICE
STHT0-77406	Stud Sensor S200	-	2	3 253560 774066	

S160 STUD SENSOR

- Detects wood studs up to 25mm and metal studs up to 38mm
- Detects live electrical cables (230V) up to 50 mm
- Automatic calibration
- Detection and marking point for the center point of wood/metal wall studs
- Angular tolerance - fewer errors when used at an angle
- Audible and visual (LED) indication when detecting live electrical lines
- Ultra-compact design for easy storage
- Easy operation with 1 button
- Supplied with 2× AAA batteries

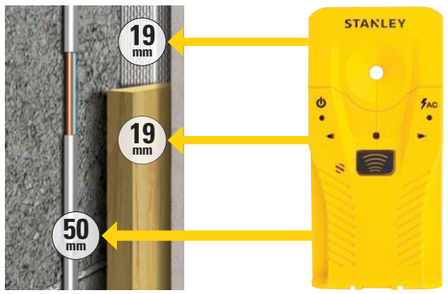

CODE	DESCRIPTION				PRICE
STHT77588-0	S160 Stud Sensor	X	4	3 253560 775889	

S110 STUD SENSOR

- Detects wood/metal studs up to 19mm
- Detects live electrical lines (230V) up to 50 mm
- Automatic calibration
- Detection and marking point for the center point of wood/metal wall studs
- Angular tolerance - fewer errors when used at an angle
- Audible and visual (LED) indication when detecting live electrical lines
- Ultra-compact design for easy storage
- Easy operation with 1 button
- Supplied with 2× AAA batteries

INSPECTION CAMERA

- Inspection Camera with 1m flexible tube for extended reach through most holes and behind most surfaces
- 8mm wide camera head for minimal surface damage and access to most cavities and crevices
- Brightness / Contrast control - Eight different levels of brightness provide maximum visibility in dark environments
- Color LCD Monitor - size 2.31", 64×48 pixels
- Water and dust resistance: IP67. Camera wall can withstand extreme conditions in the workplace
- LED light on the sensor for extra visibility
- Rotary Image Positions - rotate the display to get the best possible angle when viewing inaccessible surfaces
- Supplied with 4× AA batteries

CODE	DESCRIPTION				PRICE
STHT0-77363	Inspection camera	X	2	3 253560 773632	

THERMOMETER

- Infrared thermometer
- Thermal leak detection - from a reference temperature (green screen), scanning an area will show a red screen for higher temperature detection and blue screen for lower temperature
- Optics 8:1, allows users to measure a 32 cm circle from 2.5 m away
- Accuracy of 2% or +/- 2 degrees - for extremely accurate measurements
- Contrast backlit display - ensures visibility in all lighting conditions
- Temperature range from -38° to 520°C - wide range allows users to effectively complete desired tasks
- IP 20 for protection against dust
- Supplied with wristband and 9V battery

CODE	DESCRIPTION				PRICE
STHT0-77365	Thermometer	X	2	3 253560 773656	

WALL PLUG TESTER

- Quickly check the wall plug status
- Quick diagnostic / time saving by not dismounting the wall plug
- Easy to use and compact
- LED Indicate Condition of the wring (Correct, Missing Earth, Live-Earth Reverse, Live-Neutral Reverse, Missing Neutral)

CODE	DESCRIPTION				PRICE

THE MEASURE OF A PRO™

HAMMERS

Designed for the professional, STANLEY® hammers feature specific heads and weights for building and demo along with secure grips, and fatigue-reducing handles.

We've carried out extensive research when developing our latest range of ANTIVIBE™ hammers. New vibration dampening technology ensures ultimate protection against hand and arm stress and yet delivers more striking power than traditional designs. The unique ANTIVIBE™ collars absorb potentially harmful shockwaves transferring additional power into every strike. Giving you the ultimate power and control.

FATMAX® HAMMER

Performance from within

We have conducted extensive research to develop ANTIVIBE™ hammers. Thanks to the new technology to dampen vibrations, your hands and arms are optimally protected against shocks. And yet you have more power than with traditional hammers. So you get the ultimate power and control - in every strike.

ANTIVIBE™ HAMMERS

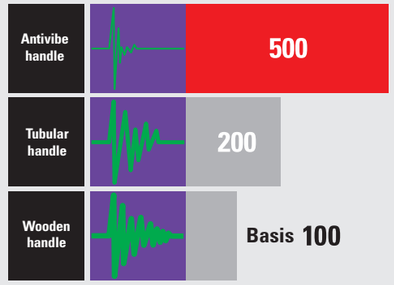

THE IDEAL COMBINATION OF POWER AND COMFORT

Head and core are made from 1 single piece.
Thermal treatment of the impact area prevents wear.
Exceptional durability head with enlarged hitting area
Exclusive tuning fork shock absorber system for very good protection against shocks.
Ergonomic handle in flexible polyurethane coating for optimal grip and perfect balance.

ANTIVIBE SYSTEM

This system has been specially developed to reduce vibrations and thus also reduces user fatigue.

Comparative analysis of the dampening effect

COMPO-CAST HAMMERS

NO RECOIL

Small steel balls in the head of the hammer ensure that the hammer does not bounce back after the strike.

NO SPARKS

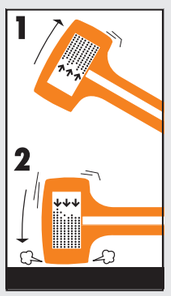

No part of the metal is left unprotected, which allows the hammers to be used in places where even the smallest spark could cause an explosion.

SHOCKPROOF

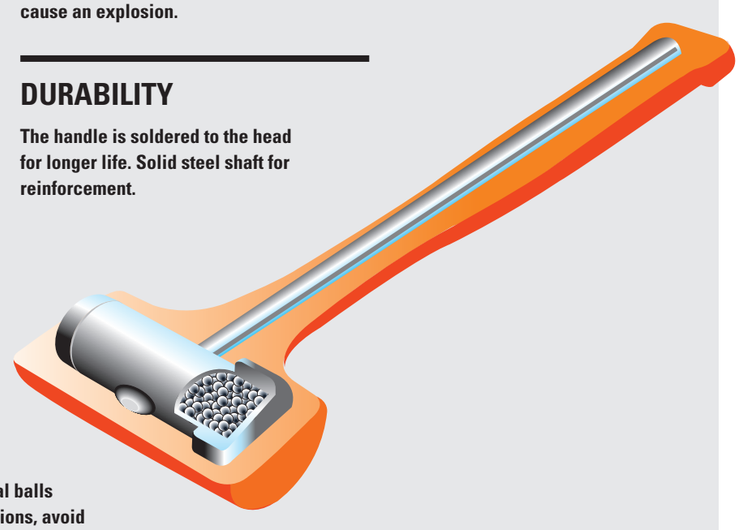

The head and metal handle are completely covered with a thick layer of urethane to protect tools and surfaces from hammer impact.

DURABILITY

The handle is soldered to the head for longer life. Solid steel shaft for reinforcement.

With each hit, the metal balls moves to absorb vibrations, avoid recoil, and improve control.

GLASSFIBER HAMMER

The longer handle and fiberglass shaft provide even better performance and durability.

CLAW HAMMERS

FATMAX® CURVED CLAW HAMMER NEXT GENERATION

STANLEY FATMAX

- **Patented Over-Sized Strike Face 25% larger "Sweet Spot"**

TOOLS THAT HIT HARD

- Soft face helps prevent marring. No exposed metal on face, head or shaft
- Dead blow function eliminates bounceback when striking hardened surfaces
- Un-Cast™ construction on non-ferrous materials eliminates sparking and won't absorb liquids
- Steel reinforced handle provides strength and resists breaking on overstrike

COMPO-CAST™

The power when you need it

STANLEY Compo-Cast™ hammers are made of non-ferrous materials with a Uni-Cast™ construction that eliminates sparking and won't absorb liqiud. The soft face feature hepls prevent marring or struck materials while the steel reinforced handle provides strength and durability.

SPECIALITY HAMMERS

ANTIVIBE™ CLUB HAMMER

- Club hammer for use in confined spaces with little room for full arc swing
- Applications include striking chisels, punches, and star-drills and many industrial applications

DEMOLITION TOOLS

Stanley's demolition lineup is turning more than a few heads. Why? Because we make demolition tools that are more than just tough and strong. Our Wonder Bars® have been engineered to make pulling and prying easier. Stanley demolition bars are engineered with the professional in mind. They are forged from high-carbon steel with a trilobe design that can withstand up to 175kg-force meter of bending momentum.

PRACTICAL INFO

THE BEST DEMOLITION TOOLS

FUBARS

A unique tool from STANLEY for multiple purposes, available in multiple sizes. They can be used for prying, splitting, bending, hitting and nail pulling. The FATMAX FuBar should become an important part of any contractor's toolbox.

WONDER BARS

Extremely useful for prying, nail pulling and bending material and available in many sizes.

PRECISION BARS

Shorter bars for close up applications, including some with extra-wide lifting surfaces to spread the load. This allows you to gently lift and remove existing castings with minimal damage.

CROWBARS

FATMAX® PRO FUBAR™

STANLEY FATMAX

- One-piece steel bar for added durability
- 4-in-1 tool for prying, splitting, board bending, and striking jobs
- Tempered face prevents chipping
- Double serrated jaws to grip wood and floor coverings
- Nail puller to pull out nails effortlessly

THE MEASURE OF A PRO™

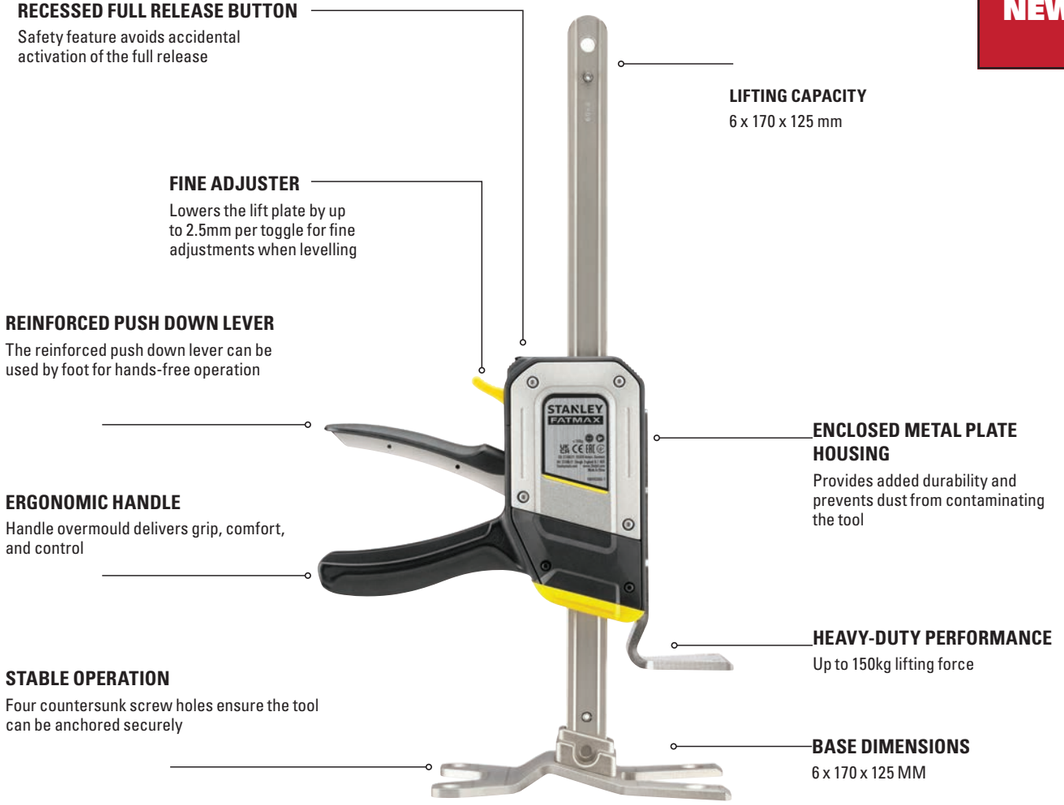

CLAMPS AND VICES

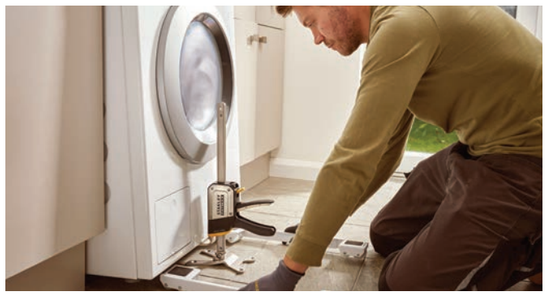

Clamps and vises come in all shapes and sizes and are meant for a variety of tasks, but they have same things in common. A good clamp or vise is easy to tighten and adjust; it holds securely; and it won't mar the surface it's clamped to. Stanley trigger clamps have three-times the travel of competitive clamps and can be adjusted with one hand. Our vises have roll-forged threads for prec ise adjustment and durability. Our F clamps have removable jaw pads to protect surfaces. Stanley offers a variety of clamps and vises so customers can match the size and shape to the job at hand.

PRACTICAL INFO

THE BEST CLAMPS FOR YOUR NEEDS

When making your choice, always keep in mind what you intend to do with the clamp and choose the size and performance accordingly – too heavy and too powerful and you may damage a fine work, too light and you can damage the clamp.

FATMAX® TRIGGER CLAMP

These provide the easiest and fastest adjustment and are ideal for clamping material on the workbench and for holding parts together during gluing. By reversing the jaws, they can be used to spread surfaces apart in a safe and controlled manner.

FATMAX® HYBRID CLAMP

FATMAX® Hybrid clamps combines the speed of a one-handed clamp with the power of a traditional clutch lock F-Clamp. With a combined 374 kg of sustained clamping force.

C-CLAMPS

Forged from heavy duty malleable iron for added strength. They are used in the same situations as the 'F' clamps, but can handle a higher terminal load. 100 mm and 150 mm are the most convenient sizes.

SPRING CLIPS

Ideal for many small light tasks such as cloths, etc.

BAND CLAMP & CORNER CLAMPS

A 4.5 m long nylon strap can be used to clamp any shape. Two clamps in combination with rigid rods make this clamp very powerful and offer a very large capacity. Corner clamps are suitable for clamping one corner at a time. They have the advantage that they can be clamped on the workbench, so that both hands are free to make final adjustments.

FATMAX® HYBRID TRIGGER CLAMP

STANLEY FATMAX

EASY TO SWITCH TO SPREADING

Quick-change mechanism without additional tools to switch from clamping to spreading.

INTEGRATED EXTENSION

Integrated storage tie combines two clamps for additional increase in length.

STURDY AND STRONG

Metal jaws and steel I-profile rail prevent the clamp from bending and breaking. For longer lifetime.

FULL 374 KG CLAMPING FORCE

Built-in screw handle (with hexagonal profile) for extremely secure grip.

PROTECTIVE CAPS WITH V-GROOVES

Effective clamping of cylindrical or irregularly shaped workpieces such as tubes.

PRECISE CLAMPING

High-quality steel profile supports additional pressure, stable and pack torsionally rigid

BAILEY® CORNER CLAMP FOR LIGHT DUTY APPLICATIONS

- Individually adjustable clamping arms to clamp material of the same or different thickness at right angles
- Mounting holes to secure the clamp to the work surface
- Durable cast aluminum construction

CODE	DESCRIPTION				PRICE
0-83-121	Corner clamp	X	4	3 253560 831219	

BAILEY® CORNER CLAMP FOR HEAVY DUTY APPLICATIONS

- Pronounced design to clamp material of the same or different thickness at right angles
- Patented rotatable head for use as a parallel screw clamp
- Comfort and maximum turning power thanks to bi-material trilobular handle
- Mounting holes to secure the clamp to the work surface
- Die-cast zinc construction for durability during heavy duty applications

CODE	DESCRIPTION				PRICE
0-83-122	Heavy Duty Corner Clamp	X	2	3 253560 831226	

MULTI-ANGLE VISE 360°

- Lockable knee joint: rotates 360°
- Convenient thanks to multiple positions
- Cast aluminum construction - light but strong
- Clamp capacity: 80mm
- Removable protective covers
- Base can be fixed on workbench for extra stability

CODE	DESCRIPTION				PRICE
1-83-069	Multi Angle Vise 360	-	2	3 253561 830693	

QUICK-RELEASE VICE

- Vice with quick-release system
- One-hand lever to easily open and close jaws for quick repositioning
- Steel construction for greater durability and long life
- Rubber guards can be removed to use steel jaws if required
- Secure the thread to a workbench for a firm grip and easy repositioning
- Clamping capacity: 160 kg

CODE	DESCRIPTION				PRICE
0-83-179	Quick-release screw	X	2	3 253560 831790	

MAXSTEEL® VISE

- Durable cast iron construction for strength
- Threaded for smooth use and durability
- Base can be fixed on a workbench for stability
- Base pivots for versatile use
- Chrome handles and screw against corrosion
- Clamping force: 1100 kg

CODE	DESCRIPTION				PRICE

THE MEASURE OF A PRO™

SAWS

STANLEY saws are designed for manual precision, accuracy, and sharpness, our handsaws can cut through endless tasks. Whether you're working with molding, trim, or cutting with or across the woodgrain, we have the tool for you.

PRACTICAL INFO

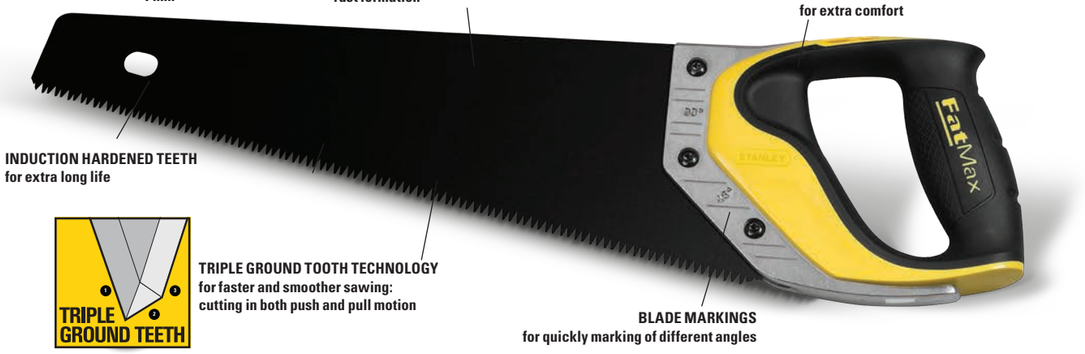

THE BEST SAWS TO MEET YOUR NEEDS

Choosing a hand saw is about selecting the right size and type of saw teeth for a specific job. Tooth size is measured in the number of full teeth per inch (tpi). Fewer and larger teeth give a fast cut, while more and smaller teeth ensure a finer finish.

The table below is a quick guide to which sawtooth size is best suited for different requirements. The number of teeth and the suggested applications can be found in the properties for all saws on the following pages.

FATMAX® BLADEARMOR® ☆☆☆☆☆

THE MEASURE OF A PRO™

CHISELS AND PUNCHES

Dress, shape, drive and refine hard materials from masonry to metal with professional-grade STANLEY® cold chisels, punches, and files.

FATMAX® CHISELS

STANLEY FATMAX

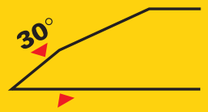

These FATMAX® chisels are made with hardened, tempered high-chrome carbon alloy steel blades for edge retention. They are 50% stronger than Stanley wood chisels. They are constructed with a steel thru-tang shaft and a steel striking cap for use with steel-headed hammers.

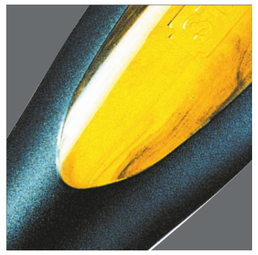

STANLEY chisels are sharpened to an exact 25° angle and can be used for all types of applications. For even sharper cutting, they can also be sharpened at an angle of 30°.

Standard angle (25°)

Sharpening angle (30°)

BIMATERIAL HANDLE

A flexible urethane coating ensures optimum ease of use. The FATMAX® handle is longer and provides greater precision when handling the chisel.

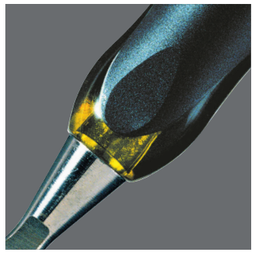

BLADE OF HIGH QUALITY

Blade of professional quality EN31 for exceptional cutting performance

METAL END CAP

Protects the chisel during intensive use and against the impact of hammer strikes. Ideal for striking & for durability and long life.

THRU TANG DESIGN

Superior Thru Tang design – 50% stronger* handle for extra reassurance and durability.

THE MEASURE OF A PRO™

PLANES

STANLEY has built a worldwide reputation for exceptional planing quality, which remains the reference of choice among professional users to this day.

BAILEY SMOOTHING BENCH PLANE

CHOOSING A PLANE

The Stanley range of planes covers all your likely needs and they all feature the finest hardened, tempered and precision ground chrome carbon alloy steel cutters. As a general guide the longer and wider the plane the truer the surface along the length of the timber will be.

BAILEY PLANE
General purpose bench plane for workshop, site or fine finishing

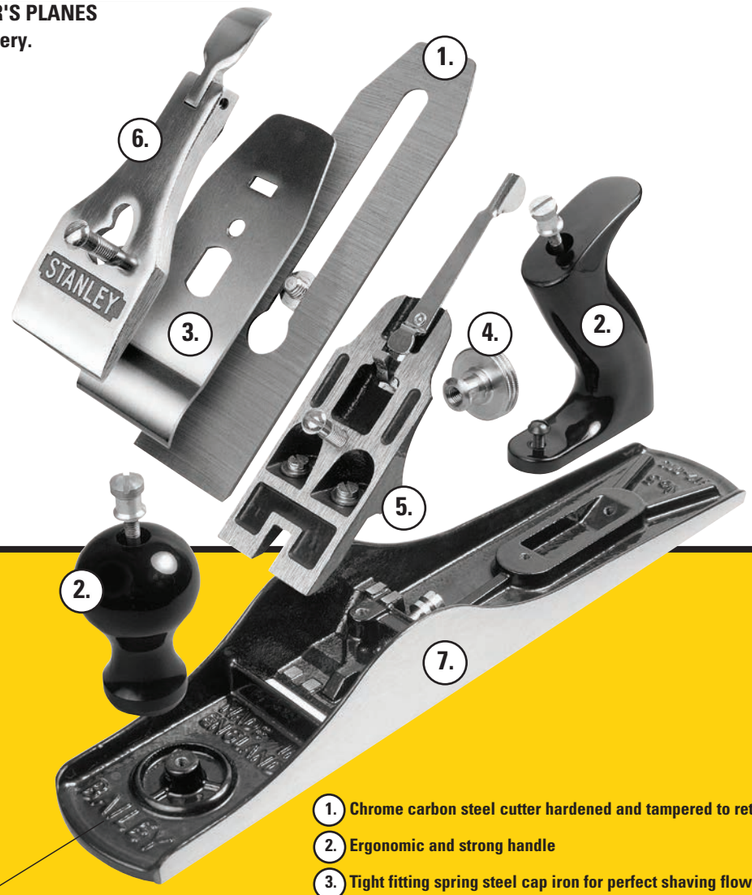

SMALL BENCH PLANES / BLOCK PLANES
For final finishing and for use with one hand.

REBATE PLANES
For grooves and large works.

CABINETMAKER'S PLANES
For delicate joinery.

REPLACEABLE BLADE PLANE
For stock removal, smoothing and rebating wood

REPLACEABLE BLADE BLOCK PLANE
Blade can be positioned for standard use or bull nose for working in corners

THE BAILEY PLANE
ALL STANLEY KNOW-HOW
IN ONE SINGLE PLANER.

1. Chrome carbon steel cutter hardened and tampered to retain a keen cutting edge
2. Ergonomic and strong handle
3. Tight fitting spring steel cap iron for perfect shaving flow
4. Finger tip adjustment for depth of cut and cutter alignment
5. Fully adjustable frog for all tasks and timber types
6. Kidney shaped lever cap screw hole prevents accidental slippage of cutter
7. Precision cast fine grey iron base for stability and wear resistance. Precision round base and sides ensure performance to the highest tolerances

BAILEY® PLANERS

BENCH PLANE N°4

- Suitable for general use
- Cherry wood handles
- Sturdy brass adjusters
- 1 simple adjustment mechanism for lateral and depth control
- Convenient and quick mechanism to adjust the mouth
- Base and cleat molded in 1 piece to reduce vibration
- Cast iron base
- Smooth ground sole, accurate between .07 and .003 mm
- Cutting angle 45°
- A2 steel chisel - 3 mm

CODE	DESCRIPTION				PRICE
1-12-136	Bench plane n°4 - 245 × 50 mm	-	1	3 253561 121364	

STANLEY® "NO. 62" SWEETHEART™ LOW ANGLE JACK PLANE

- Suitable for larger surfaces
- Cherry wood handles
- Sturdy brass adjusters
- 1 simple adjustment mechanism for lateral and depth control
- Convenient and quick mechanism to adjust the mouth
- Base and cleat molded in 1 piece to reduce vibration
- Cast iron base
- Smooth ground sole, accurate to .07-.003 mm
- Cutting angle 12°
- A2 steel chisel - 4.7mm

CODE	DESCRIPTION				PRICE
1-12-137	STANLEY® "No. 62" Sweetheart™ Low Angle Jack Plane*	-	1	3 253561 121371	

**Not in the Nordic assortment - special order required. Minimum order quantity applied.*

STANLEY® BAILEY® PROFESSIONAL SMOOTHING PLANE

- For general use
- Painted, black steel version with smooth ground sole and sides
- With adjustable frog and fine adjustment

CODE	DESCRIPTION				PRICE

REPLACEMENT BLADE PLANERS

REPLACEMENT BLADE PLANE RB10

- Plane with smooth sole and sides
- Can be used as a rabbet plane, Bench plane
- Fully depth adjustable
- Supplied with 6 spare blades, quickly replaceable and safely stored in the handle

CODE	DESCRIPTION				PRICE
1-12-100	Combination slicer RB10 260 × 50 mm	X	6	5 000366 121000	

REPLACEMENT BLADE PLANE RB5

- Light, cast model plane with machined sole
- Can be used as a rabbet plane, Bench plane and nose plane
- Spare blades can be safely stored in the handle
- Supplied with 2 spare blades (0-12-378)

CODE	DESCRIPTION				PRICE
0-12-105	Replacement blade plane RB5 150 × 50 mm	X	2	3 253560 121051	

PLANER CUTTER

- 12-378 : straight for grooving or Plane edges (RB108)
- For use on 1-12-100 (RB10) and 0-12-105 (RB5)

CODE	DESCRIPTION				PRICE
0-12-378	Planer cutter Straight 50 mm - 5 pcs/card	X	10	3 253560 123789	

BLOCK PLANERS

BLOCK PLANE 60 1/2

- Fully adjustable cutting depth, alignment and jaw opening
- Cutting angle : 13.5°
- For end grain and plastic

CODE	DESCRIPTION				PRICE
1-12-060	Block Plane 60 1/2 150 × 35mm	X	1	3 253561 120602	

PLANER CUTTER FOR 12-060 (NEW MODEL)

- Made of chrome-plated carbon steel for long-lasting sharpness

CODE	DESCRIPTION				PRICE
0-12-504	Plane cutter 1-12-060 New 35 mm	X	6	3 253560 125042	

BLOCK PLANE 9 1/2

- Fully adjustable cutting depth, alignment and jaw opening
- Cutting angle : 21°
- For fine grain finishing and general Plane

CODE	DESCRIPTION				PRICE
1-12-020	Block plane 9 1/2 160 × 40 mm	X	1	3 253561 120206	

BLOCK PLANE 220

- Fully adjustable cutting depth and alignment
- General Plane
- Cutting angle: 21°

CODE	DESCRIPTION				PRICE
1-12-220	Block plane 220 180 × 40 mm	X	1	3 253561 122200	

PLANER CUTTER FOR 12-020 AND 12-220 (NEW MODEL)

- Made of chrome-plated carbon steel for long-lasting sharpness
- For use on:
  1-12-020 Bench Plane 9 1/2 160 × 40 mm
  1-12-220 Bench Plane 220 180 × 40 mm

CODE	DESCRIPTION				PRICE
0-12-508	Planer tool 1-12-020 / 1-12-220 New 40 mm	X	6	3 253560 125080	

BLOCK PLANE 110

- Easy to set up
- Bench plane for general Plane work
- Cutting angle: 21°

CODE	DESCRIPTION				PRICE
1-12-116	Block plane 110 180 × 40 mm	X	1	3 253561 121166	

BLOCK PLANE 102

- Easy to set up
- Bench plane for general Plane work
- Cutting angle: 21°

CODE	DESCRIPTION				PRICE
1-12-102	Block plane 102 140 × 34 mm	-	1	3 253561 121029	

SPECIFIC PLANERS

REBATE PLANE

- Sharpened sole and sides
- Integrated handle
- Fully adjustable, with pre-cutter, complete with width and depth guide
- Black lacquered version

CODE	DESCRIPTION				PRICE
12/1/078	Rebate plane 255 × 38 mm	-	1	3 253561 120787	

GHOST SHAVE

- Easy to set up
- 12-151: flat sole for flat and convex surfaces
- 12-152: round sole for concave surfaces

CODE	DESCRIPTION				PRICE
1-12-151	Spoke slicer Flat 55 mm	-	1	5 000366 121512

THE MEASURE OF A PRO™

SCREWDRIVERS, BITS HEX KEYS

Drive bolts and screws with reliable precision. STANLEY® screwdrivers and hex keys deliver dependable, no-nonsense performance every time. Comfort, quality and versatility are the three attributes we engineer into our screwdriver line . Stanley screwdriver handles are shaped and sized to provide comfort in the hand and torque at the fastener head. The materials and construction are of the highest quality to resist corrosion, chipping and breaking. And with tips ranging from standard to Phillips® to Torx® to flat, STANLEY screwdrivers cover almost evey application.

PRACTICAL INFO

OUR ASSORTMENT

Large selection of screwdrivers adapted to each type of screw.

STANLEY ESSENTIAL

Chrome vanadium blade
Soft handle for comfort
Hardened tip

STANLEY CUSHION GRIP

Magnetic tip
Steel blade with chrome finish
Bi-material handle

STANLEY FATMAX

STAINLESS STEEL
Stainless steel blade
Doesn't give rust a chance

BOLSTER
These screwdrivers incorporate an additional hexagonal bolster for high torque applications, when used with an open end spanner.

EXTRA DURIABLE TIP
50% longer life*

Manufactured from heavy-duty carbon silicon steel for outstanding durability and reduced risk of tip breakage.

*** Compared to STANLEY Cushion Grip screwdrivers**

FLARED

The collar is flared

PARALLEL

The tip has the same width as of the screw

PHILLIPS

POZI

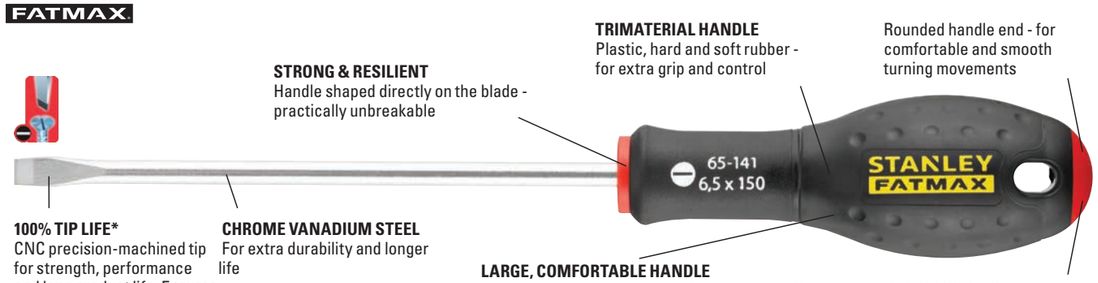

TORX

FATMAX® SCREWDRIVERS

FATMAX® SCREWDRIVER STANDARD FLAT

STANLEY FATMAX

STRONG & RESILIENT
Handle shaped directly on the blade - practically unbreakable

TRIMATERIAL HANDLE
Plastic, hard and soft rubber - for extra grip and control

Rounded handle end - for comfortable and smooth turning movements

100% TIP LIFE*
CNC precision-machined tip for strength, performance and long product life. Ensures optimum dimensional fit, accuracy, control, and reduces cam out. Sand-blasted for protection against corrosion and wear.

CHROME VANADIUM STEEL
For extra durability and longer life

LARGE, COMFORTABLE HANDLE
Large diameter, tri-material soft-grip handle offers excellent torque for driving wood screws. Provides outstanding comfort and grip

COLOR CODING
Clear tip ID on the handle enables easy identification of the right screwdriver for each job

THE MEASURE OF A PRO™

MECHANICAL TOOLS

The STANLEY® offering of mechanical tools supplies both do-ityourselfers and pros with a wide range of product options to successfully accomplish the job at hand. STANLEY® mechanical tools are made to the same professional standards as the tools you use on the job every day.

Turn to STANLEY® for ratcheting, flare nut, and combination open/box-end wrench sets in standard SAE and metric sizes in either polish or black chrome finish. Or take a STANLEY® single adjustable, ratcheting, pipe wrench for a spin.

REVERSIBLE RATCHETING WRENCH SETS

PLIERS AND SNIPS

The great appeal - in fact the entire point - of pliers and adjustable wrenches is handiness. They should be versatile, durable and designed to accomplish tasks efficiently. STANLEY's are.

STANLEY® pliers and snips are available in a range of sizes, handles, and types for multiple applications in sets or single units.

THE MEASURE OF A PRO™

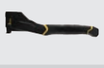

FASTENING TOOLS

Ease of use is rule number one in fastening. STANLEY® fastening tools are filled with features that make them a snap to operate. Our staple guns have easy-to-squeeze triggers and comfortable handles to reduce hand fatigue. Our tackers feature shock-absorbing handles. Our glue guns are trigger fed. And we lengthened the handles on our riveters so they'd require less force to engage. We even made se lecting and storing fasteners hassle-free with colorcoded packaging for accurate identification in the store and water-resistant cases for durability on the work site.

PRACTICAL INFO

CHOOSE THE RIGHT STAPLER AND TACKER

MANUAL STAPLE GUN

Top performance for most fastening applications

- Shoot a variety of staple sizes and formats, including cable staples and brads
- Fast and accurate fastening in most applications

- TIP 1: Choose the best staple type for the job. If you want to remove it later select the shortest that is suitable, if it is to be permanent select a longer staple. Set the power to hi or lo setting and test on a scrap piece.
- TIP 2: If the staples are to be visible it is good practice to try to keep them in alignment and an equal distance apart – for accurate spacing it's a good idea to make a gauge.
- TIP 3: If you are stapling fragile materials that have a distinct structure like wood veneer, always position the staple across the grain for greater strength. With some thin materials, even on low power, the staple may tend to cut through and become ineffective. Change to a broad crown staple or add a piece of stronger material between the staple crown and the work piece.
- TIP 4: When work is completed fi re off one fi nal staple and hold the handle in the closed position and place the wire loop over the plastic hook on the handle to hold the handle in the closed position for storage.

HAMMER TACKER

For heavy duty applications and fast stapling

- Fixing sheet materials such as insulation and waterproof membranes to wood
  Ideal for flooring, roofing and pallet labelling

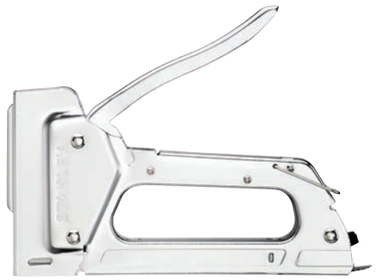

ELECTRICAL STAPLE GUN

Ideal for heavy duty applications in MDF and Plywood. Electric staples provide constant firing power.

- Renovation & woodworking
- Installation and repair of fences

STORAGE SOLUTIONS

The diverse STANLEY® storage box line-up includes heavy-duty toolboxes which can be customised using the foam insert, drawer units for accessories and small parts, as well as a handy caddy for small storage sets and larger storage boxes for tools.

No matter what kit you take on a job, you'll need to have your accessories to hand including all your screws, clips, connectors, cables and more. The STANLEY® organisers let you keep everything in its place with tough clear case lids for fast selection and removable storage cups for added flexibility.

A COMPLETE STORAGE RANGE

A range of possibilities

STANLEY offers a complete range of tool trolleys for the construction sites, with a capacity of 50 to 190 liters and with a frame in polypropylene and metal. All high-quality and robust storage systems, suitable for professional use.
Different storage options: toolboxes, boxes for power tools and organizers with different compartments. Large choice of sizes, colours, materials (bimaterial or not), with or without different compartments, with metal or synthetic closing hooks, etc.
Wide range of robust and easy to move trestles. Due to their polypropylene construction, these trestles have the best weight/strength ratio on the market. Large options from simple folding trestles to telescopic trestles with a high load capacity.

STANLEY MOBILE STORAGE 50L

Time saving

We understand that time-saving products are an important asset for craftsmen. That is why we designed a new tool trolley, the STANLEY® tool trolley 50L with storage compartments in the lid, a removable case for small hand tools and a lock that can be opened and closed with one hand. Everything you need is easy to find and easily accessible. Thanks to the telescopic handle and large wheels, this spacious tool trolley is also easy to move.

CANTILEVER TOOLBOX

Everything has its place

We often work with professionals. That's why we know you need to have the right tools at your fingertips to get the job done faster and easier. But small parts and accessories are easily lost at the bottom of the box. Everything remains visible in our popular cantilever model. That makes it easier to get the right tool when you need it. We were also told that it is essential that tools are not damaged. That is why this box is not only robust and sturdy, but also waterproof.

THE FATMAX® QUICK ACCESS BACKPACK

Tools at your fingertips

Many professionals told us that they spend a lot of time reorganizing their toolbox, depending on the job that is scheduled for the day. This was partly due to the inefficient use of space in their current toolbox. To remedy this, we made a tool bag in which the tools can be stored upright.

TOOL BAGS

STANLEY® FATMAX® QUICK-ACCESS BACKPACK

STANLEY FATMAX

- Large open compartment for quick tool access intended for long tools/ organisers/power tools/kit boxes
- Tool back pack– workstation with 4 compartments combines high strong flexible high quality tarpaulin with 600D
