STANLEY®

A STORY BEHIND EVERY TOOL

Every Stanley Tool in this catalogue is created to help you work better, smarter, faster. Our Discovery Teams work side-by-side with real tradesmen every day to see how you work and identify ways to help you improve your performance.

It means our tools all come with something extra: understanding. From the tape that lets you measure accurately and single-handedly to the hammer that's heavy on nails but light on your arm, we create tools that help you be the best.

Because we understand that there's nothing better than knowing you've done a great job, and knowing that you're respected for it by the people whose opinion really matters – the guys you work with.

USER GUIDE

THE NAMES

STANLEY

Solid, well-built, innovative tools for general everyday use. Hardwearing and reliable, with added pro-inspired features: like Mylar® or Tylon® coating to give your tape greater durability, or knives with Instant Blade Change to reduce your downtime.

STANLEY FATMAX

Tools with real pro performance built in. Whether you're a specialist who needs a specialist tool, or you simply want to bring the very best tool out every time, these are the tools you're looking for. Every one comes with innovative features that help you work faster, hit harder or cut sharper. And if you are looking for the the pinnacle of professionalism in any tool category, look out for Stanley FatMax Pro.

THE ADVICE AND REVIEWS

But the catalogue isn't only about the tools. It's also about getting the best from them, and learning what other pro's think of them. So you'll also find expert pro advice about using each tool, and see reviews and ratings from real pro's, too.

REAL PRO'S ADVICE

At Stanley, we know that professional tradesmen the world over have more respect for each other's opinions than anything we might say. That's why we ask Real Pro's like you, who use them in the real world every day, for your honest reviews and ratings of our all our tools.

Check on our websites for Product ratings by Real pro's.

THE PRO'S ADVICE

THE RIGHT KNIFE FOR THE RIGHT JOB

FIXED BLADE KNIVES
These are designed for the heaviest of applications. Although the blade is fixed, the majority of Stanley® Fixed Blade Knives incorporate a rapid blade changing mechanism.

RETRACTABLE BLADE KNIVES
These offer similar performance to the fixed blade models and the blade can be retracted safely into the handle when not in use.

SNAP-OFF BLADE KNIVES
The snap-off blade offers constant sharp edges, but is also strong and thick enough to apply heavy pressure without the blade breaking.

9MM SNAP-OFF BLADE KNIVES
The thinner 9mm Snap-off blade is ideal for thinner more delicate sheet materials and general craft work.

LAYOUT

MAGNETIC TAPE A HELPING HAND

Sometimes it's easier when the tool does the job for you. Our Discovery Team saw that a tape with a strong and accurate magnetic tip would allow tradesmen to measure on their own - even when steel beams and lintels were tricky to access. So we created a new tape with a patented design so that you can spend less time hanging around. And more time getting the job done.

THE PRO'S ADVICE

JOHN DAVIES
CARPET FITTER

MAKE YOUR TAPES WORK HARDER

IMPROVE ACCURACY

Tilt the curved blade as close as possible to the surface you are measuring.

MARKING OUT CIRCLES

Pivot the hook slot on a nail or screw inserted into the work-piece and hold a pencil at the length of the radius required.

MINIMISE MEASUREMENT ERROR

When fitting one component to another, such as a door into a frame, minimise the risk of error by making a pencil mark on the back of the tape blade to indicate the actual dimension, then transfer it to the door. The pencil mark can easily be removed with a damp cloth.

PENCIL GAUGING

Use the small notch in the end hook for 'pencil gauging' parallel lines down the length of the material, using your finger or the mouth of the rule case to maintain a fixed distance from the edge.

SETTING OUT JOISTS

Simply use the conveniently diamond marked 40cm/16" centres.

IMPROVE ACCURACY

If the end hook interferes with accuracy by holding the blade off the surface, try laying the tape flat on the work and make your measurement from a convenient 'zero' point such as 10cm, so a measurement of 10cm would appear as 20cm on the tape.

AVOID TAPE DAMAGE

Control the rate of rewind and ensure that the tape doesn't kink.

TIP FOR ELECTRICIANS

The blade of a Stanley tape can make an excellent, makeshift 'Fish Tape' for drawing cables through cavities.

STRAIGHT LINES

You can draw a straight line simply by turning the blade over

THE PRO'S ADVICE

JOHN DAVIES
CARPET FITTER

MAKE YOUR LONG TAPES WORK HARDER

LOCK THE BLADE & APPLY TENSION

This reduces measurement inaccuracies due to blade droop when measuring across open spaces and uneven surfaces. Use the hardened ground spike on the open framed tape to achieve more tension. The principal benefit of the open frame is that debris carried by the tape does not affect the functioning of the tape mechanism.

MARKING OUT CIRCLES

All end hooks have the facility to mark out large radii as needed in marking out sport pitches.

AVOID TAPE DAMAGE

Take care when rewinding to prevent damage to the blade. The rapid rewind of the FatMax and PowerWinder tapes is very useful but needs to be slowed down as you near the last few metres. Avoid twists and kinks in the blade, particularly steel, as this could result in breakage. Wipe the blade clean as you rewind, particularly with an enclosed case model.

EUROPEAN PRECISION STANDARDS permissible tolerances					
CLASS	10m +/-	20m +/-	30m +/-	50m +/-	100m +/-
II	2.3	4.3	6.3	10.3	20.3
III	4.6	8.6	12.6	20.6	40.6

DON'T LEAVE EXPOSED TO THE SUN

Both steel and fibreglass tapes should be kept away from excessive heat from the sun to reduce the risk of expansion and stretch.

THE PRO'S ADVICE

JOHN DAVIES
CARPET FITTER

THE RIGHT LEVEL FOR THE JOB

BOX BEAM LEVELS

The box section provides the ultimate in terms of overall strength and performance. They are fitted with solid block acrylic vials that have been machined to exacting tolerances to ensure that the movement of the bubble is smooth and comes to rest quickly. A small magnifying area in the centre makes reading the position of the vial easier.

'I' BEAM LEVELS

I beam or girder section levels offer a lighter weight alternative, fitted with tubular 360° vials.

SELECT THE RIGHT LENGTH OF LEVEL

The longer the better, particularly if the surface to be levelled is not perfectly true. A shorter level will tend to follow the contour of the surface, whereas a longer level will even out the undulations. For brick-laying and general builders the best choice is the 1200mm FatMax Xtreme and for concreters the 1800mm would be a good choice. Finish carpenters may prefer a lighter box or I beam section body in a length of 600 or 900mm, ideal for fitting kitchen furniture and general trim work.

ADJUSTABLE VIAL LEVEL

The rotating vial can be adjusted to between 0° and 90°, enabling you to set angles for roofing or drainage pipes etc.

TORPEDO LEVEL

The FatMax® Xtreme Torpedo Level has a V groove machined in the magnetic base, which allows it to fit firmly on pipe work, ideal for scaffolders, plus it is also perfect for installing machinery, air conditioning ducting or shelving.

SHORT TAPES

FATMAX® PRO - METRIC

STANLEY
FATMAX®

Cushion grip provides sturdy, slip-resistant hold

Highly polished chrome case with rubber grip to withstand heavy use and giving slip resistant hold

Belt clip

Available in 3 sizes: 5 m - 8 m - 10 m

Wide 32 mm blade for easy number reading

Mylar® coated blade is up to 10 times more resistant to abrasion than normal lacquered blades

Blade Armor coating on the first 150mm reduces the risk of breaking the tape by 95%

Huge standout of almost 4 metres for easy one person measuring

True zero end hook - moves to compensate for accurate inside and outside measurements

6 Rivet end hook - 40% stronger than a 2 rivet hook construction

STANLEY	Length in m	Width in mm

FATMAX® BLADE ARMOR TAPE METRIC

STANLEY
FATMAX

- Mylar™ blade coating provides greater durability and wear resistance of blade markings for improved readability over time and prolonged product life
- Blade Armor coating reduces risk of tape breakage by 90%, prolonging product life
- Blade stays rigid up to 3.5m, for easy single person useage
- Shock resistant soft impact resistant case withstands shocks and knocks offering greater blade protection
- Easy read blade markings (centralised numbers) allow for easy identification of measurement and greater accuracy
- Compact case design is Ergonomically shaped with a cushioned grip for maximum comfort in the hand and to use
- Thermoplastic Blade Armor cover for optimum protection of the tape on the first 14 centimetres - Limits wear and reduces the risk of breaking the tape by 95%
- Belt clip
- Case has flexible elastomer cover for greater user comfort
- Specially designed hook grabs on side, top or bottom for versatility

FATMAX® MINI - METRIC

STANLEY
FATMAX

- Belt clip
- The tape is blocked effectively
- The 3-rivet hook offers anti-wrench resistance that is 40 % higher than a 2-rivet hook
- The tape is protected by a MYLAR abrasion-resistant coating - The lifetime is multiplied by 10 compared with a traditional tape
- Ultra-thick tape - 0.13 mm (+15 % compared with a traditional tape)
- Antishock, ergonomic and compact bimaterial DYNAGRIP case
- Case made out of rigid polypropylene and flexible elastomer for a comfortable grip
- 10 Times longer lifetime than a normal short tape
- Hook with adjustable position for interior and external measurements

LONG TAPE "MASTER II" 30M

STANLEY

- Master II Mabolon with Handle - Class II
- Class II
- Supplied without case
- The Stanley exclusivity MABOLON tape provides exceptional resistance to abrasion, chemical attack and limits the risks of breakage in the event of folding
- Tempered steel tape to ensure both solidity and flexibility
- Removable anchoring point
- Large tape loop (DIN standard) equipped with a removable strap with a fully retractable catching pallet
- Tape and handle interchangeable for right handed or left handed users
- Highly resistant chrome plated brass frame
- Ergonomic moulded handle
- Yellow tape 12.7 mm

CLOSED CASE - FIBREGLASS BLADE METRIC

STANLEY

- Class III
- Retractable handle for transport, articulated for rapid tape winding
- Tape blade has washable pvc coating to increase life
- Corrosion-resistant, UV protected, non-conductive tape - highly resistant to site drainage
- White surface with 2mm graduations for precise measuring
- Reinforced fiberglass tape - reduces elasticity and improves measuring accuracy
- Case perforated at rear to allow the tape to be cleaned
- High impact ABS closed case to withstand severe work conditions
- Available in 15m/50ft, 30m/100ft, 10m/ 20m, 30m 12.7mm wide blades
- Available in 10, 20 and 30 m version

STANLEY	Length in m	Width in mm

SPIRIT LEVEL DESIGNED FOR TOUGH WORK

Levels are sometimes used and abused on site. That's why the Discovery Team has been working with users to design a level that's up to the job. The new levels have a machined bottom and concave sides to keep them durable and true. And with a magnified easy to read vial, you can keep the job on track.

DIGITAL LEVELS

STANLEY® DIGITAL ANGLE LEVEL - 40CM

STANLEY

- Digital Angle level
- LCD Screen
- Angle measurement 0° up to 180°
- Horizontal and vertical vials
- Anodized aluminum profile
- Accuracy $\pm 0.1^\circ$

STANLEY	Length in cm	Nr of vials			
0-42-087	40	2	X	1	3253560420871

FATMAX® DIGITAL LEVEL

**STANLEY
FATMAX**

- LCD screen is easy to read measurements
- 360° readout – flips in upsidedown position. Functional in all positions.
- HOLD function - make it easy to use even in low light condition
- MEMORY RECALL (9 measurements)
- MODE function gives the degree/percentage/in-ft
- RECALIBRATION function and "false zero"
- Buzzer at 0°, 45° and 90°
- Low battery indicator
- Digital accuracy: 0.10 at level and plumb, 0.20 at other angles
- Waterproof bag included

STANLEY	Length in cm	Nr of vials	Primary surface (mm/m)			
0-42-065	60	2	0.1 & 0.2	X	1	3253560420659
0-42-086	120	2	0.1 & 0.2	X	1	3253560420864

LEVELS

FATMAX® PRO I BEAM LEVEL

STANLEY
FATMAX

- World's 1st MOST DURABLE I-BEAM EVER
- Light weight aluminium frame - makes it more comfortable to use
- Thicker/taller cross section for 3x stronger level (vs PRO Levels) - improving life in abusive work environments
- Block vials for best durability and accuracy to 1mm/m (vs tubular vials) - high accuracy
- Shock resistant end over-molded caps
- Magnetic and non magnetic range
- Long Lasting & Shock Resistant

STANLEY	Length in cm	Nr of vials	Primary surface (mm/m)

FATMAX® PRO LEVEL

STANLEY
FATMAX

- Solid acrylic block vials provide best in class accuracy in 8 orientations of +/-0.5mm/m
- Rubber over moulded protective end cas
- Dual machined levelling surfaces for maximum accuracy
- Bi-material hand grips are screwed into the frame
- Rare earth magnets, which are twice as strong as basic strip magnets, are built into the level for stability
- Vials magnified by 20% for improved all round visibility
- Rock solid box beam construction is up to 5 times stronger than other Stanley levels
- Durable powder coated frame
- Vials magnified by 20% for improved all round visibility
- Low profile vial covers for easy cleaning

STANLEY	Length in cm	Nr of vials	Primary surface (mm/m)

FATMAX® II LEVEL - STANDARD

STANLEY
FATMAX

- 6mm taller than most competitors
- 6-9mm wider than other levels in its class
- Heaviest in its class giving ultimate strength
- Shock absorbing end caps for long life
- Accuracy +/- 0,5mm/m
- Illuminated vial so that it's easier to see
- 1 horizontal vial
- 2 vertical vial
- Lifetime guarantee for accuracy
- Large vial with bridged "dual view" centre vial

STANLEY	Length in cm	Nr of vials	Primary surface (mm/m)

- 2 graduated moulded bodyvials (120 mm)
- Vials for water level

STANLEY	Length in mm			
0-42-430	120	X	6	3253560424305

THE PRO'S ADVICE

JOHN DAVIES
CARPET FITTER

THE RIGHT MARKING OUT TOOL FOR THE JOB

COMBINATION SQUARE

An essential part of the on-site carpenters' tool kit, as it incorporates a range of functions in one tool: square, mitre square, depth and height gauge, level, steel rule and built in scribe.

SLIDING BEVEL

Designed for replicating and marking out angles, but it needs to be used in association with a protractor if you wish to set it to a specific angle.

CARPENTERS FLAT STEEL SQUARE

Ideal if you regularly need to mark out large sheets of panelling. Both arms of the square are graduated.

MARKING GAUGE

Used for scoring lines along the length of a piece of wood parallel to the face edge or face side. It is more accurate to saw or plane to a scored line than it is to work to a pencil line. The gauge consists of a stock, which rubs against the face edge or face side of the work and a graduated stem which holds a hardened scribing pin. The distance of the pin from the stock is set by a rule and the stem locked in position with a thumbscrew.

FOLDING SQUARE

Invaluable for large scale setting out of building profiles, foundations, floor tiling, paving, driveway construction and landscape gardening. The simple folding system makes it compact and easily portable.

CHALK LINE

Used for marking straight lines on the ground, wall or ceiling. An essential part of the builders' and fitters' tool kit for setting out brick courses, tiling and installation of fitted furniture etc. The FatMax® Xtreme model raises chalk lines to new levels of performance by providing a 3 times more abrasion resistant line, together with many other innovative features.

THE PRO'S ADVICE

JOHN DAVIES
CARPET FITTER

MAKE YOUR MARKING OUT TOOLS WORK HARDER

SURFACE AND EDGE PREPARATION

STEP 1 Plane the face of the wood and check that the surface is flat across its width and true along its length, then mark it with the traditional 'Face Side' mark.

STEP 2 Plane the adjacent edge true, flat and square.

STEP 3 Place the stock of the square on the face side surface and look to see if there is any light showing between blade and wood. Check the wood at several points down the length, make any fine adjustments with the plane and mark this edge with the 'Face Edge' sign. From here on all marking with a square, bevel or marking gauge should be only from the face side or face edge.

STEP 2 To score a line across the face edge, turn the square to place the stock against the face side, place the knife blade into the previous cut and slide the square blade up to the knife blade.

STEP 3 Draw out the chalked line and lock the crank handle into place and tension the cord.

MARKING A LINE ON ALL FOUR FACES

This should be done with a knife for greater accuracy, plus it is easier to work to a cut line rather than a pencil line.

STEP 1 To scribe a line across the face side, hold the stock tightly against the face edge of the wood using your thumb and three fingers. Your index finger should be against the inside edge of the square blade to prevent it from slipping when you press the knife against the outer edge to scribe the line.

TOP TIP

If several items of the same length are required, clamp them together and mark all at the same time.

THE PRO'S ADVICE

JOHN DAVIES
CARPET FITTER

MAKE YOUR MARKING OUT TOOLS WORK HARDER

LARGE STEEL SQUARE SQUARES

These do not have a stock to hold against the work edge, so to position the square accurately use a spare piece of wood held against the edge and position the square against that.

SLIDING BEVEL

These can be used for surface/edge preparation and marking out as the Try Square, but be careful when there are bevels at each end of a piece of wood. Always mark from the face side or face edge and check that the bevels are facing in the correct direction.

CHALK LINE

STEP 1 Check that the case is well charged with chalk and give it a shake from time to time to ensure that the cord is well chalked. With a new line, draw the cord out to its full extent, pour in a small amount of chalk and rewind it. Complete filling when the cord is fully rewound.

STEP 2 Anchor the end hook securely at one end of the piece to be marked.

STEP 3 Draw out the chalked line and lock the crank handle into place and tension the cord.

STEP 4 Place the cord carefully onto the correct position on the work. With finger and thumb lift the cord a few centimetres to create some tension and then allow it to 'snap' onto the surface to be marked.

STEP 5 Rewind away from the marked line to avoid contaminating the work surface and line.

IMPORTANT

Keep your chalk line free from moisture and for surfaces to be painted, check that the chalk does not 'bleed' through paint. When using near furnishings, check that the chalk does not stain fabrics or carpets.

MARKING OUT TOOLS

CARPENTER'S SQUARE

STANLEY

- mm graduations on both sides
- Stock bevelled for setting out both 90° and 45° angles
- Extruded aluminium stock is triple riveted to the blade for strength and accuracy
- High visibility photo etched graduated stainless steel blade engraved with deep hollow (GRAVEMAT procedure)
- Aluminium profited mitre heel
- Available in 140 x 250mm, 200 x 300mm, 200 x 400mm

STANLEY	Length in mm	Width in mm			
1-45-685	140	250	-	6	3253561456855
1-45-686	200	300	-	6	3253561456862

MULTIUSE SQUARE

STANLEY

- Graduation in mm
- Integrated flask
- Synthetic heel for light weight
- Can be used as a try and mitre square, depth or height gauge and spirit level
- Scriber fitting for accuracy & convenience
- Easy to read, long lasting engraved blade
- 360° vial for all round visibility
- Lightweight and durable metal body with 3 machined faces for accuracy
- 300mm / 12" metric imperial for ease of use

STANLEY	Length in mm	Description			
2-46-017	300	Metric / Imperial	X	6	3253562460172

STEEL SQUARE

STANLEY

- Not supplied with data books
- Face graduated every 2mm, reverse of blade every 1/8" th for detailed work
- Reverse reading scale and crisply embossed graduations for easy reading
- Steel square with buffed finish and protective lacquer coating for rust resistance
- Available in 600mm x 400mm, 406mm x 38mm

STANLEY	Length in mm	Width in mm	Description			
1-45-530	600	400	Metric only	-	1	3253561455308

FOLDING BUILDER'S SQUARE

STANLEY

- Easy to fold and store with hang hold
- Suspension hole for vertical storage
- Angles of 45° and 90°
- Solid, light aluminium square ideal for checking and chalking in shell construction, tiling and assembly of partitions
- Measuring 1200mm x 1200mm x 1720mm - 48" x 48" x 68"

STANLEY	Length in cm	Width in cm			
1-45-013	172	122	-	1	3253561450136

FALSE CARPENTER'S SQUARE

STANLEY

- Moulded heel with gripping grooves
- Blade blocking system
- Tough plastic handle
- Sliding nickel plated steel blade
- High carbon steel tempered blade

STANLEY	Length in mm

STANLEY LARGE CAPACITY CHALK REEL

STANLEY

- Large capacity Chalk Reel : 510gr
- 45M line - For big jobs and long distances
- Nylon/polyester high-strength braided line - Extended life, and strength
- 3:1 rewind gear ratio - Retracts line 3x faster than standard 1:1 reels
- High-impact ABS housing - Protects reel from impact
- Rubber over-molding - Provides comfort, secure grip
- Slide-open door - For quick chalk refills
- Stainless steel Ring & Hook Attachment - Easy to use

STANLEY	Cord length in m

NEW

POWERWINDER CHALK LINE

STANLEY

- High Impact ABS Case
- Contains 100ft of 40lb string
- Quick Gear Release – Crank Will Not Spin When Pulling Out Line
- Stainless steel end hook does not rust
- On-Board Hook Storage
- Steel Crank Handle
- Metal crank folds inside the case for storage
- Sliding door for quick and easy refill
- Large, aggressive, stainless steel end hook does not rust
- Weight and style combination provides plumb bob utility

STANLEY	Cord length in m			
0-47-460	30	X	6	3253560474607

POWERWINDER CHALK LINE KIT

STANLEY

- Contains 100ft of 40lb string
- Quick Gear Release – Crank Will Not Spin When Pulling Out Line
- On-Board Hook Storage
- Stainless steel end hook does not rust
- Steel Crank Handle
- Metal crank folds inside the case for storage
- Sliding door for quick and easy refill
- Large, aggressive, stainless steel end hook does not rust
- Weight and style combination provides plumb bob utility
- Case holds 45g/ 1.5oz chalk to reduce filling times

STANLEY	Cord length in m

CHALK LINE - STANLEY®

STANLEY

- Universal hanging clip
- The line is blocked by folding the handle
- Metal case for strength and long life
- 30g chalk capacity
- Can be used vertically as a plumb bob
- Yellow colour for better visibility
- Stainless steel end hook for added durability and rust prevention
- Die cast aluminium case for durability
- The powder is put in by screwing the watertight upper milled stopper, equipped with felt to regulate the flow of powder
- Available in 15m and 30m

STANLEY	Cord length in m			
0-47-100	30	X	6	3253560471002

REPLACEMENT CHALK LINE

STANLEY

- Cabled absorbant resistant cotton
- 30 m replacement line for all chalk lines
- Line diameter: 1 mm

STANLEY	Cord length in m			
0-47-101	30	X	6	3253560471019

STANLEY® CHALK LINE

STANLEY

- Kit contains 30m chalk line, 113g blue chalk
- Holds 100ft of String
- New Ergonomic Design
- Crank folds into case for storage
- On-Board Hook Storage
- Can be used vertically as a plumb bob
- 30g/ 1oz chalk capacity
- Stainless steel end hook does not rust
- Sliding door for quick and easy refill
- High impact ABS case for durability

STANLEY	Cord length in m	Description			
0-47-440	30	Kit contains 30m chalk line, 113g blue chalk	X	6	3253560474409

COMPACT CHALK REEL

STANLEY

- Less than half the size (by volume) of standard chalk reels
- Takes up less space and weighs less, making it easier to carry on the job or store in the home
- 9M precision line
- Snaps clean, accurate lines
- High-impact ABS housing - Durable and light
- Soft grip over-molding which provides comfortable, secure grip
- 3:1 rewind gear ratio retracts line 3x faster than standard 1:1 reels
- Slide-open door for quick chalk refills
- 28gr chalk capacity which snaps >50 lines per refill
- Belt clip easy for convenient transport

CHALK POWDER

STANLEY

- White: for interior work such as carpet fitting
- Colour recommendations
- Red: for external masonry work
- Blue : all round colour for interior and exterior use
- Good resistance to all atmospheric conditions
- Water resistant
- Powder specially formulated for good adhesion and high visibility
- Available in 115g (blue dot), 115g (red dot), 115g (white dot), 225g (blue powder), 225g (red powder), 1000g blue powder, 1000g red powder
- Indelible

ARE LASERS POTENTIALLY HAZARDOUS?

Lasers are classed from 1 up to 4 in terms of potential hazard. Stanley laser classes range from class 1 up to class 2M, which pose little or no hazard.

Class 1 - Poses no threat of biological damage.

Class 2 - The output could harm a person if they were to stare into a beam for a long period of time.

Class 2M - Lasers have a divergent beam and may be hazardous if an optical instrument is placed in front of the eye such as a magnifying glass.

WARRANTY REPAIR AND CALIBRATION SERVICE

All Stanley laser products are supplied with a 1 year warranty. Repairs within "normal" usage are free during the warranty period. For repairs within warranty, you will need to contact your dealer who will send the item to Stanley for repair. The item will be repaired and returned to your dealer to hand back to you. For repairs outside of warranty, please follow the process above. An estimate of the repair work will be issued to you to gain consent for the repair work to be carried out. We advise that products are serviced annually and calibrated every 6 months.

WHAT IS A LASER?

LASER stands for 'Light Amplification by Stimulated Emission of Radiation'. A diode is used to create a concentrated laser beam of light in one wavelength. The shorter the wavelength the brighter and more visible the laser beam. Stanley lasers have a standard wavelength of 635 nanometers, which is suitable for use up to 300m.

IP RATING

When working in dusty and damp conditions, the IP rating of the laser is also important. A selection of Stanley lasers are rated IP54 (dust resistant and splash proof) or IP66 (dust resistant and completely waterproof).

LASER MEASUREMENT

CALCULATE GRADIENTS

CALCULATE DISTANCES

ESTIMATE HEIGHTS:
calculate heights with
2 or 3 points

CALCULATE PERIMETERS

LASER MEASURES

TLM 65 - 20M

STANLEY

- Short distance working range of 20M
- The right functions for DIYers - to be used like a tape
- Compact design and easy to store

NEW

STANLEY	Accuracy of measurement (mm)	Minimum measuring distance (m)			
STHT1-77032	+/- 3	0.5	x	10	3253561770326

TLM 99 - 30M

STANLEY

- Provides Distance/area/volume calculation
- Accuracy: +/- 2mm
- Continuous measurement "tracking" function Finds distance from a target quickly and easily
- Addition / subtraction Convenient way to calculate in the field, using standard measurement units
- New Working range; 30M
- Ergonomical cases

STANLEY	Accuracy of measurement (mm)	Minimum measuring distance (m)	Maximum measuring distance (m)			
STHT1-77138	+/- 2.0	0.01	30	X	10	3253561771385

TLM 330 - 100M

STANLEY

- New Working Range - 100M
- Accuracy: +/- 1mm
- Distance/area/volume calculation
- Inclination sensor
- Continuous measurement
- Indirect measurement using Pythagoras
- Memory
- Backlit, 3 line display
- Multifunctional end piece
- Overmolded housing and IP 54 water/debris resistance
- Ergonomical Cases
- Improved Quality

ROTATING LASER PRO

RL HW FATMAX® EXTERIOR ROTATING LASER

STANLEY
FATMAX

- Working range 600m
- Drop proof glass enclosed beacon
- Anti-drift system
- Rugged handle and rubber mouldings add extra strength
- Glass Enclosed Head Provides IP rating IP66

STANLEY	Maximum measuring distance (m)			
1-77-496	N/A	-	1	3253561774966

RL HW+ FATMAX® EXTERIOR ROTARY LASER

STANLEY
FATMAX

- Working range 600m
- Drop proof glass enclosed beacon
- The rotating head can be set up for a 10% slope (manual grade)
- Anti-drift system
- Rugged handle and rubber mouldings add extra strength
- Glass Enclosed Head Provides IP rating IP66

STANLEY	Maximum measuring distance (m)			
1-77-429	N/A	-	1	3253561774294

RL HGW FATMAX® EXTERIOR ROTARY LASER

STANLEY
FATMAX

- Working range 600m
- Drop proof glass enclosed beacon
- The rotating head can be set up for a 15% slope (digital grade)
- Anti-drift system
- Rugged handle and rubber mouldings add extra strength
- Glass Enclosed Head Provides IP rating IP66

STANLEY	Maximum measuring distance (m)			
1-77-439	N/A	-	1	3253561774393

RL HV FATMAX® INTERIOR ROTARY LASER

STANLEY
FATMAX

- Working range 400m
- Drop proof glass enclosed beacon
- Horizontal, square laser beam
- The rotating head can be set up for a 10% slope (manual grade)
- Anti-drift system
- Multiple scanning mode (10° / 45° / 90°)
- Can be used with a remote control
- Rugged handle and rubber mouldings add extra strength
- Glass Enclosed Head Provides IP rating IP66

STANLEY	Maximum measuring distance (m)			
1-77-497	60	-	1	3253561774973

RL HVPW FATMAX® INTERIOR ROTARY LASER

STANLEY
FATMAX

- Working range 400m
- Drop proof glass enclosed beacon
- Horizontal, plumb and square beam
- The rotating head can be set up for a 10% slope (manual grade)
- Anti-drift system
- Multiple scanning mode (10° / 45° / 90°)
- Can be used with a remote control
- Rugged handle and rubber mouldings
- Glass Enclosed Head Provides IP rating IP66

STANLEY	Maximum measuring distance (m)			
1-77-427	60	-	1	3253561774270

LASER PENDULUM PRO

STANLEY® SPOT LINE LASER - SLP3

STANLEY

- It has a working range of 30m
- It can project 3 beam (front + up & down)
- It produces the same accuracy spec as Phase I
- It has a magnetically dampended pendulum
- The pendulum has a locking system lock for safe transportation
- It has a special base allowing magnet to rails + pivoting
- Runs on 3 AA batteries

STANLEY	Accuracy of measurement (mm)	Nm			
1-77-318	4 mm / 10 m	1 x 635 nm	-	1	3253561773181

STANLEY® SPOT LINE LASER - SLP5

STANLEY

- It has a working range of 30m (spot) / 10m (line)
- It projects 5 beams (3 horizontal, 1 vertical, 1 plumb) and 1 horizontal line >120°
- Out of true level sensor
- Improved accuracy spec
- It has a magnetically dampended pendulum
- The special base allows magnet to steel rails + pivoting
- The pendulum has a locking device for safe transportation
- Runs on 3 AA batteries

STANLEY	Accuracy of measurement (mm)	Nm			
1-77-319	3 mm / 15 m (H)	2 x 635 nm	-	1	3253561773198

STANLEY® CROSS LINE LASER SCL

STANLEY

- Working range 10m
- Working environment : Interior/ Exterior use
- Project 1 horizontal and 1 vertical line to create a cross line (V:130° / H:130°)
- Same accuracy spec as Phase I
- Pulse beam mode allows operating outdoors in combination with the detector (option)
- Out of true level sensor
- Magnetically dampended pendulum
- Pendulum lock for safe transportation
- Runs on 3 AA batteries

STANLEY	Accuracy of measurement (mm)	Nm			
1-77-320	3 mm / 15 m (V), 3 mm / 15 m (H)	2 x 635 nm	-	1	3253561773204

STANLEY® CROSS LINE LASER - SCL-D

STANLEY

- Working range 30m (spot) / 15m (line) - up to 50m with a detector
- Working environment : Interior/ Exterior use
- Project 1 horizontal and 1 vertical line to create a cross line (V:130° / H:130°)
- Project 2 beams : 1 vertical and 1 plumb
- Pulse beam mode allows operating outdoors in combination with the detector
- Out of true level sensor
- Magnetically dampended pendulum
- Pendulum lock for safe transportation
- Runs on 3 AA batteries

STANLEY	Accuracy of measurement (mm)	Nm			
1-77-321	3 mm / 15 m (U), 6 mm / 15 m (D)	3 x 635 nm	-	1	3253561773211

STANLEY® MULTILINE LASER - SML

STANLEY

- Working range 15m / 50m with a detector
- Working environment : Interior / Exterior use
- Project 1 horizontal and 4 vertical line to create a cross line (V:130° / H:180°)
- Project 1 plumb
- Pulse beam mode allows operating outdoors in combination with the detector (supplied)
- Out of true level sensor
- Magnetically dampended pendulum
- Pendulum lock for safe transportation
- 3 leg tripod - can be remove to fit tripod
- Runs on 4 AA batteries

STANLEY	External working range with detector M	Nm			
1-77-322	50 m	5 x 635 nm, 1 x 650 nm	-	1	3253561773228

LASER PENDULUM DIY

STANLEY® CUBIX™ LASER LEVEL

STANLEY

NEW

- Self leveling cross line laser
- Single laser diode split with lens
- Can also be flip on his back for ceiling application use
- 3 position power / lock switch
- Visual warning / indication for "manual mode"
- Visual warning / indication for "out of level" when in "self leveling mode"
- Integrated slots in housing for quick connection to accessory bracket
- Can be placed everywhere in the room
- 1/4-20 thread on bottom for standard accessory mounting
- Easy to use with existing accessories
- Bracket supplied
- The bracket has ball and socket joints on the arm which allows for multi-directional movement on both ends
- The bracket has an adjustable clamp with soft grip pads to attach to objects
- Bracket - Quick connect head is removable to allow 1/4-20 thread to be used with other standard device(s)

STANLEY				
STHT1-77340		-	1	3253561773402

STANLEY® CROSS90™

STANLEY

NEW

- Self leveling cross line laser
- Additional beam at 90°
- 3 laser diodes, 1 for each of the beams
- Can also be flip on his back for ceiling application use
- 3 position power / lock switch
- Visual warning / indication for "manual mode"
- Visual warning / indication for "out of level" when in "self leveling mode"
- Integrated slots in housing for quick connection to accessory bracket
- Can be placed everywhere in the room
- 1/4-20 thread on bottom for standard accessory mounting
- Easy to use bracket - supplied
- The bracket has ball and socket joints on the arm which allows for multi-directional movement on both ends
- The bracket has an adjustable clamp with soft grip pads to attach to objects
- Bracket - Quick connect head is removable to allow 1/4-20 thread to be used with other standard device(s)

STANLEY				
STHT1-77341		-	1	3253561773419

FATMAX® CL2XTI CROSS LINE LASER

STANLEY
FATMAX

- 25 meter range in a interior and exterior environment
- Projects 1 horizontal and 1 vertical line to create a cross line
- Pulsed beam mode allows operation outdoors in combination with the detector
- Out of true level sensor
- Magnetically dampended pendulum
- Runs on 3x AA batteries (supplied)
- Pendulum lock for safe transportation

STANLEY	Accuracy of measurement (mm)	Working accuracy			
1-77-121	3 mm @ 10 m	25 m	X	1	3253561771231

FATMAX® CLI CROSS LINE LASER KIT INCLUDING CLI LASER UNIT + POLE

STANLEY

- 25 meter range, in an interior and exterior working environment
- Projects 1 horizontal and 1 vertical line to create a cross line
- Out of true level sensor
- Magnetically dampended pendulum
- Pendulum lock for safe transportation

STANLEY	Accuracy of measurement (mm)	Number of pieces	Working accuracy			
1-77-123	4mm @ 10 m	6	25 m	X	4	3253561771231

SLL360 LINE LASER

STANLEY
FATMAX

- Projects 360° degree self leveling line which gives an uninterrupted line just like a rotating laser
- Automatic Self Leveling
- Laser line at 360° + 1 vertical line allows a cross line on front of the unit
- No pulse diode
- Locking pendulum
- Specific Wall Mount bracket for fine adjustments and can fit pole on
- Simple push button operation makes it very easy to operate

STANLEY	Accuracy of measurement (mm)			
STHT1-77137	4mm @ 10m	-	1	3253561771378

FATMAX® CL90I CROSS LINE LASER

STANLEY

- 25 meter range in both interior and exterior working environment
- Out of true level sensor

STANLEY	Accuracy of measurement (mm)	Number of pieces	Working accuracy			
1-77-021	3 mm @ 9 m	4	25 m	X	1	3253561770210

AUTO LEVEL PRO

AL24 GVP LEVELLING SET

STANLEY

- Fits to standard tripod
- Available in 360 degree or 400 gon versions
- 1:100 Stadia for estimating distance
- Fine motion knobs for endless, easy horizontal movement
- Large easy to use focusing knob
- Right angle prism for easy bubble viewing
- Top mounted optical peepsight for ease of ranging
- Large effective aperture with 30 cms minimum range
- Compensator lock protects unit in transit
- Magnetically dampened, wire hung compensator for optimum accuracy & range
- Sealed, dust & water protected for working in all conditions
- Scope has sun-shade for bright light working

STANLEY				
1-77-160		-	1	3253561771606

FATMAX® AL32 AUTOMATIC LEVEL LASER PACK

STANLEY
FATMAX

- X32 magnification - 33% higher magnification
- Wire-hung, magnetically dampened compensator - Improves optimum range and accuracy
- Compensator lock - Protects instrument in transit and storage
- Top mounted optical peep sight - Helps set and quick reference
- Large easy-to-use, precise focussing knob - Ease of use
- Penta Prism - Makes it easier to view the bubble
- Pack includes tripod and 5mtr staff
- Water resistant, sealed construction - Can be used in all weathers

STANLEY				
1-77-245		-	1	3253561772450

MEASURING WHEEL

MW40M COUNTER MEASURING WHEEL

STANLEY

- Folding Kick stand
- Die cast Aluminium wheel with wear resistant rubber tread for improved traction & longer life
- Folding wheel mount
- Heavy Duty metal folding handle & rubber hand grip for maximum durability
- 5 digit counter with manual reset button for superb accuracy
- Gear driven counter with tough plastic housing for long life

STANLEY	Wheel diameter (mm)	Working accuracy			
1-77-174	318	+/- 1%	-	6	3253561771743

DMW40 DIGITAL MEASURING WHEEL, 254MM WHEEL

STANLEY

- Sturdy measuring wheel folds down for easy storage
- Heavy duty metal folding handle & rubber hand grip
- Manual power off
- Folding Kick stand
- Die cast Aluminium wheel with wear resistant rubber tread for improved traction & longer life
- Folding wheel mount
- Recall last reading (optional) when auto power off
- Auto power off after 2 minutes of suspended use
- Digital counter with data storage memory - stores up to 8 measurements
- Automatic conversion of units of measurement for simple & quick usage
- Bi Directional measurement (measures in either direction) for greater versatility
- Designed for exterior use

STANLEY	Wheel diameter (mm)	Working accuracy			
1-77-176	254	+/- 1%	-	6	3253561771767

LASER ACCESSORIES

STANLEY® TRIPOD TPM1

STANLEY

- Specific tripod for Multiline laser for outdoor or indoor use
- Specific tripod for Multiline laser for outdoor or indoor use
- Working height : 90 to 173 cm
- Working height : 90 to 173 cm

STANLEY				
1-77-131		-	1	3253561771316

ALUMINIUM TRIPOD 97CM TO 160CM

STANLEY

- Tubular screw for siting plumb
- Extending centre column 102cm - 292cm on 1-77-164 model
- Working height 0,97M to 1,60M
- Working height 0,97M to 1,60M
- 5/8" thread
- Strong, aluminium body with cast flat baseplate, extending legs & quick clamp
- Electrostatically powder painted casting for a durable and long-lasting finish
- Heavy-duty poly-webbing shoulder strap
- Hinges are attached with screws, not rivets
- Lightweight and durable aluminum hinge, clamp and shoe casting

STANLEY				
1-77-163		-	1	3253561771637

ALUMINIUM TRIPOD 119CM TO 292CM

STANLEY

- Tubular screw for siting plumb
- Working height 1,02M to 2,92M
- Quick release extending leg clamps
- 5/8" thread
- Strong, aluminium body with cast flat baseplate, extending legs & quick clamp
- Extending centre column 102cm - 292cm on 1-77-164 model
- Electrostatically powder painted casting for a durable and long-lasting finish
- Heavy-duty poly-webbing shoulder strap
- Hinges are attached with screws, not rivets
- Lightweight and durable aluminum hinge, clamp and shoe casting

LASER GRADE ADAPTER

STANLEY

- Fine knurled setscrew and protractor plate

STANLEY				
1-77-168		-	1	3253561771682

TRIPOD VERTICAL APPLICATION MOUNT & WALLMOUNT

STANLEY

- Height adjustment via fine screw thread and graduation indicator
- May be screwed to wall surface for ease of use
- 5/8" thread
- 5/8" thread fitting - fitted with channel mount & lock

STANLEY				
1-77-172		-	1	3253561771729

STANLEY ADAPTOR 1/4-5/8

STANLEY

- Small adaptor to fit multiline laser on all pole (Screwthread : 1/4)
- Height : 2cm
- Large base

STANLEY				
1-77-128		-	1	3253561771286

STANLEY ADAPTOR 5/8-5/8

STANLEY

- Long adaptor to fit multiline laser on all tripod (Screwthread : 5/8)
- Height : 7cm

STANLEY				
1-77-024		-	1	3253561770241

CHARGER CLRL100

STANLEY

- Charger for rechargeable batteries in the Multiline and Rotary units
- Charger for rechargeable batteries in the unit Specific adaptor for EUR and UK plugs

STANLEY				
1-77-127		-	1	3253561771279

STANLEY® RECHARGEABLE BATTERIES X4 AA

STANLEY

- Rechargeable batteries AA
- Battey life : 15h

KNIV

ES

AND
BLADES

SAFETY KNIFE SAFETY FIRST

Knife blades can sometimes be dangerous. So we decided to do something about it and designed the ultimate safety knife. The blade automatically retracts, drastically reducing the chance of injury. But that's not all - our Discovery Team found that you had ideas for more features. So we listened. The new knife also features a wrap cutter and tape splitter saving time and protecting you from injury - all in one.

THE PRO'S ADVICE

JOHN DAVIES
CARPET FITTER

THE RIGHT KNIFE FOR THE RIGHT JOB

FIXED BLADE KNIVES

These are designed for the heaviest of applications. Although the blade is fixed, the majority of Stanley® Fixed Blade Knives incorporate a rapid blade changing mechanism.

RETRACTABLE BLADE KNIVES

These offer similar performance to the fixed blade models and the blade can be retracted safely into the handle when not in use.

SNAP-OFF BLADE KNIVES

The snap-off blade offers constant sharp edges, but is also strong and thick enough to apply heavy pressure without the blade breaking.

9MM SNAP-OFF BLADE KNIVES

The thinner 9mm Snap-off blade is ideal for thinner more delicate sheet materials and general craft work.

CRAFT, SPORT AND POCKET KNIVES

Handy pocket, craft and sports knives ideal for a wide variety of tasks.

RETRACTABLE BLADE KNIVES

FATMAX® XTREME™ TWIN BLADE KNIFE

STANLEY
FATMAX

- Twin Blade Sliders
- Instant Blade Change Button
- Thumb Pad for extra grip
- Blades Storage for 5 blades
- Ergonomic design grip
- Interlocking nose for security
- Blade clamp increases Push Back force
- Torsional resistance prevents knife from separating when twisted
- Knife still operates if dropped
- Solvent resistant to: Gasoline, Turpentine, Lacquer, Alcohol, Thinners, Mineral Spirits

STANLEY	Length in mm			
0-10-789	180	X	6	3253560107895

FATMAX® RETRACTABLE UTILITY KNIFE

STANLEY
FATMAX

- Push button blade change
- Thumb rest
- Blade storage lock
- Cartridge holds up to 5 blades
- Torsional resistance prevents knife from separating when twisted
- Temperature resistance: -40°C to +60°C
- Drop testing ensures knife still operates even if dropped
- Solvent resistance ensures resistance to: Gasoline, Turpentine, Lacquer, Alcohol, Thinners, Mineral Spirits
- Corrosion resistance means that knife stays operational even in excessive humidity
- Long life with over 2000 cycles with no deviation

STANLEY	Length in mm			
0-10-778	170	X	6	3253560107789

QUICK CHANGE KNIFE

STANLEY

- Interlock system - lateral locking of the blade
- Slot for cutting string
- Anti-sliding support zone for the thumb
- Metal body for heavy duty use
- Integrated wire snap off blade knife
- Thumb pressure pad
- Supplied with 3 blades
- 8-blade storage holder - accessible without tools
- Quick blade change through simple pressure on yellow button
- Ergonomic bimaterial body - for precise guiding of the cut and comfort of use

STANLEY	Length in mm			
0-10-788	180	X	6	3253560107888

TITAN RB

STANLEY

- Rear hinge and tightening wheel system for quick blade changing without tools
- Steel blade holder
- Ideal for precision cutting of the most flexible to the most resistant materials (paper, cardboard, plastic, leather)
- Ergonomic shape
- Available with scabbard
- Supplied with 5 blades
- Available with sheath
- Lacquered body for better comfort during use
- Strong high quality brass wheel for efficient locking of the blade
- Lightweight aluminium body combining ease of use and durability

STANLEY	Length in mm			
2-10-122	185	X	12	3253562101228

AUTOLOAD RETRACTABLE KNIFE

STANLEY

- Instant soft grip with rubber slider - Increased comfort
- Instant soft grip with rubber slider - Increased comfort
- Easy storage access - creates convenient access to new blades
- Narrow nose – ideal for plasterboard applications
- Accepts all standard TK blades

STANLEY	Length in mm			
0-10-237		X	4	3253560102371

NEW

SPRINGBACK KNIFE

STANLEY

- Safety knife with self retracting blade
- Supplied with special round nose heavy duty blade for ultimate safety (1992 trapezoid blade)
- The blade remains outside as long as a thumb is kept on the push button and retracts automatically when the button is released
- Zinc alloy body, very resistant and light
- Contoured handle with diagonal ribs for slip-resistant grip
- Safe, Inter-locking nose
- Epoxy Paint
- Blade storage inside the handle
- Blade Extension 1,7 cm

STANLEY	Length in mm			
0-10-189	155	X	6	3253560101893

99 E RETRACTABLE BLADE KNIFE

STANLEY

- The one and only original Stanley retractable knife
- Interlock nose firmly secures blade into knife
- Blade holder inside the handle
- Rounded push button
- Blades stored inside the handle
- A positioning stop allows better holding of the blade
- 5 blade positions allows wider usage for variety of cutting applications
- Total blade blocking even during difficult cuts
- Precision die cast zinc body both strong and lightweights
- Knife supplied with a range of 5 blades

STANLEY	Length in mm

SCREW- DRIV

ERS

THE PRO'S ADVICE

JOHN DAVIES
CARPET FITTER

THE RIGHT SCREWDRIVER FOR THE RIGHT JOB

THE FIRST DECISION IS WHICH TYPE OF TIP SHAPE YOU REQUIRE SLOTTED, PHILLIPS, POZI OR TORX

SLOTTED - IDEAL FOR TRADITIONAL CABINET MAKING

For quality craftsmanship slotted screws still look the most attractive, particularly when the slots line up perfectly. Slotted screwdrivers are made with flared tips and parallel tips. For most work select a flared tip screwdriver, but you should select a parallel tip that is the same width as the screw below the surface of the wood without damage. Select a tip that matches the width of the screw slot, too wide and it will damage the work, too narrow and it may damage the screw slot.

PHILLIPS & POZI - IDEAL FOR GENERAL JOINERY AND CONSTRUCTION

Phillips and Pozi are popular in all forms of joinery and construction, and are now used universally and referred to by their point size, 1, 2, 3 or 4 PT.

The geometry of the screw recesses is different so avoid 'making do' with the 'wrong' screwdriver. The driving faces of the Phillips screw all taper down to the tip, whereas with Pozi they are parallel which is designed to reduce 'Cam Out', the point when the screwdriver lifts out of the recess damaging the screw.

TORX - IDEAL FOR MAINTENANCE AND SERVICE ENGINEERS

This is the strongest and most wear resistant screw type most commonly found in machinery, cars and domestic appliances and commonly used for timber and decking screws.

HANDLE

For maximum performance a screwdriver handle should be moulded to the bar, with a soft grip and a round smooth end cap, which offers comfort and improved grip to provide greater torque turning power.

BAR AND TIP

Chrome vanadium steel provides a strong, corrosion resistant bar. Sand blasted tips have a fine texture, which provides an even more secure grip in the slot or recess as the harder steel of the tip 'bites' into the softer screw.

THE PRO'S ADVICE

JOHN DAVIES
CARPET FITTER

MAKE YOUR SCREWDRIVERS WORK HARDER

USE A RATCHET SCREWDRIVER

Ratchet screwdrivers make tightening screws faster and easier. Choose a screwdriver with a solid mechanism that will cope with high torque loads. Top end professional ratchet screwdrivers - like the FatMax® Xtreme - have tough, ultra fine mechanisms and come with a range of interchangeable bits to suit all fastener types.

BIGGER HANDLES = MORE TORQUE

For really stubborn fasteners, larger handled soft grip screwdrivers work best as they allow maximum purchase. For these fasteners selection of a heavy duty driver is essential as poor quality screwdrivers can chip or round when under high loads. And remember to use the right bit pattern. Pozidriv for Pozidriv and Phillips for Phillips. Always use the biggest slotted blade that the fastener and position will allow.

MULTIBIT SCREWDRIVERS - MORE FASTENERS, LESS BULK

For maintenance on the go multibit screwdrivers – ratchet or fixed – make life easier as they allow you to carry a variety of bit patterns without the bulk of carrying a whole screwdriver set. Choose a multibit that has internal storage – usually in the handle – for even more convenience and fewer lost bits.

BRADAWL - FOR QUICK SCREWDRIVING WITHOUT POWER TOOLS

When driving screws straight into soft timber without a pilot – use a bradawl to mark an indent where the screw needs to be driven. This will make sure the screw goes exactly where you want it to.

FATMAX® SCREWDRIVERS

FATMAX® FLARED

STANLEY
FATMAX®

- Large diameter handle offers great torque needed for driving wood screws
- Colour coded ends make it easy to identify the correct screwdriver for each screw type
- Smooth domed end for fast spinning action – speed and comfort
- Shot blasted tips ensure improved torque and corrosion protection
- Soft grip handle – perfect combination of great grip plus reduces fatigue
- Chrome vanadium steel bar allows for high torque and reduces the chance of tip breakage
- Handle moulded direct to bar virtually unbreakable bond - Highly reliable and providing an extra long life
- Hanging hole for easy storage
- Also comes as VDE version

FATMAX® INSULATED SCREWDRIVERS-VDE

FATMAX® FLARED INSULATED

STANLEY
FATMAX

- Individually tested to 10,000 volts
- Large diameter handle offers great torque needed for driving wood screws
- Extremely tough
- Polyamide blade insulation sleeve makes it resistant to impact at -25 degrees centigrade and ensures increased abrasion resistance and reduced moisture absorption
- The Ergonomic handle design offers both a large diameter for increased torque and a small diameter shaft ensuring high speed fastening/unfastening of machine screws - The soft touch grip ensures increased grip and comfort
- An industrial grade - 1000V a.c. insulation - Tested to EN60900:2004 meaning that that this screwdriver is suitable for live working use up to 1000V a.c
- Colour coded ends make it easy to identify the correct screwdriver for each screw type
- Smooth domed end for fast spinning action – speed and comfort
- Shot blasted tips ensure improved torque and corrosion protection
- Soft grip handle – perfect combination of great grip plus reduces fatigue
- Chrome vanadium steel bar allows for high torque and reduces the chance of tip breakage

MULTIBIT & PRECISION SCREWDRIVERS AND SETS

FATMAX® PRO FINE RATCHETING MULTIBIT SCREWDRIVER WITH BITS

STANLEY
FATMAX

- 40 tooth precision reversible ratchet with lock-out. Three positions.
- Injection molded bi-material handle.
- Smooth contoured turning METAL end cap radius for hand palm comfort.
- Ergonomic tri-lobular handle designed for comfort and positive gripping.
- Handle over-moulded with 'soft touch' TPE, textured panels for extra power generation and comfort.
- TPE marked with Stanley PIN number "69-19X".
- Stanley FatMax Pro logo hot stamped onto handle
- Removable bar with hex interface allowing use of bar in power tools and hex drivers.
- Quick release Auto-Slim magnetic bit holder.
- Selection of Chrome Vanadium (CrV) commonly used hexagon bits including – Torx, Slotted, Pozidrive and Phillips.

STANLEY				
0-69-214		X	3	3253560692148

FATMAX® HI-SPEED RATCHET SCREWDRIVER 4:1 RATIO

STANLEY
FATMAX

- 4:1 Gear Ratio for increased speed
- Ratcheting mechanism
- Bit storage in handle (6 bits)
- Also works as a regular screwdriver
- 12 bits

STANLEY				
0-69-236		X	4	3253560692360

NEW

FATMAX® CLIP-N-GRIP™ MULTI-BIT / SKRUVMEJSEL

STANLEY
FATMAX

- Integral Clip-N-Grip™ screw holding system
- Internal bit storage with end cap that carries 6 bits
- Bi-material handle provides increased comfort
- Hardened and tempered bar ensures long-life
- Features 6 precision machined bits manufactured from chrome vanadium steel
- Can be used with almost any type of screw - aluminium, brass, plastic etc

STANLEY				
9-69-188		X	12	3253569691883

MULTIBIT RATCHET SCREWDRIVER + 10 BITS

STANLEY

- Tri lobular handle, bimaterial handle for torque and easy grip
- Rust-proof chrome blade
- 3 Position ratchet mechanism
- Bearing ball system with spring mechanism to facilitate access to the tips
- Patented bit storage in handle and cap for ease of visibility, access and security
- Pawl mechanism with three positions (right, left, fixed)
- Delivered with 10 x 1/4" hex tips
- Parallel 5,6mm. Phillips n°1, 2. Pozi 1,2. Torx T10, T15. Square n°1, 2.

FATMAX® BRADAWL

STANLEY FATMAX®

- Chrome-plated Sharp pointed tip to punch holes in wood before screwing
- Comfortable and effective, ergonomic Bi-material handle
- Large diameter handle offers great torque needed for driving wood screws
- Colour coded ends make it easy to identify the correct screwdriver for each screw type
- Smooth domed end for fast spinning action – speed and comfort
- Shot blasted tips ensure improved torque and corrosion protection
- Soft grip handle – perfect combination of great grip plus reduces fatigue
- Chrome vanadium steel bar allows for high torque and reduces the chance of tip breakage
- Handle moulded direct to bar virtually unbreakable bond. Highly reliable and providing an extra long life

SAW

S

THE PRO'S ADVICE

JOHN DAVIES
CARPET FITTER

THE RIGHT SAW FOR THE JOB

SIZE AND NUMBER OF TEETH

Choosing a saw is all about selecting the right size and type of saw teeth for a particular job. Tooth size is measured in the number of complete teeth to the inch (tpi). Larger and fewer teeth give a faster cut, whereas a greater number of smaller teeth provide a finer finish.

The table below is a quick guide to show which size of saw teeth best suits different requirements, plus the number of teeth and suggested applications is listed in the features shown with all the saws on the following pages.

SAW APPLICATION		SAW TEETH REQUIRED
CONSTRUCTION WORK Construction carpentry, joists, stud framing, chipboard	▶	LARGE TEETH 7 teeth per inch
FINISH WORK Architraves and mouldings panelling, flooring, PVC	▶	SMALL TEETH 11 teeth per inch
SPECIALIST WORK Flooring, PVC pipes and mouldings, plasterboard and drywall panels, cellular concrete	▶	SPECIALLY DESIGNED SAWS With different numbers and types of teeth to suit specific tasks

THE PRO'S ADVICE

JOHN DAVIES
CARPET FITTER

MAKE YOUR SAWS WORK HARDER

MARK THE CUT WITH A KNIFE

For a tear free cut use a knife to mark the line all round the wood rather than a pencil.

CUT WITH FINISHED SURFACE UPWARDS

When fitting one component to another, such as a door into a frame, minimise the risk of error by making a pencil mark on the back of the tape blade to indicate the actual dimension, then transfer it to the door. The pencil mark can easily be removed with a damp cloth.

CUT ON THE WASTE SIDE OF THE LINE

For a precise fit it is a good idea to leave a little additional waste that you can plane off afterwards if necessary.

STARTING THE CUT

Start the cut at the edge furthest from you with the saw cutting edge angled at approximately 30° to the work surface. Use the thumbnail of the hand not holding the saw, or a scrap piece of wood, position the cutting edge to the waste side of the line. The first stroke should be a light pull to establish the cutting line (kerf).

SAWING OFF A THIN PIECE OF WOOD

To help prevent the thin piece splitting off you can clamp a piece of scrap to the far edge extending beyond the piece to be cut, which will support the saw blade and ensure a clean cut.

SAWING TECHNIQUE

As a general rule the coarser the teeth the higher the angle you should saw at, for a 7 teeth per inch hand saw start at 30° and raise angle to between 45° and 60°. For an 11 teeth per inch hand saw start the cut at 30° and raise angle to 45°. When using a back or tenon saw start at less than 20° and as the kerf extends to the full width of the wood lower the blade until almost horizontal. To help keep the saw on line hold the handle with three fingers and thumb with the index finger resting on the outside face of the handle to provide alignment. Maintain a firm but relaxed grip on the handle. Keep wrist, elbow and shoulder in line with the saw blade and the marked line. You should also align your head and eye to be in line with the cut. Use the full length of the saw in steady unhurried strokes. The rate of cut can be increased by dropping the handle as the blade is about halfway through the stroke, lift the handle for the draw stroke.

CORRECTING ALIGNMENT

If the saw starts to move off line slow down, make slight changes to your position and progressively steer the cutting edge back into alignment. Make regular checks to ensure that the cut is progressing square to the top surface.

FINISHING THE CUT

As you near the completion of the cut the sound made by the saw will change to indicate that it is time for you to support the piece that is being cut off. If you leave this too long the weight will cause it to break off damaging the work.

THE PRO'S ADVICE

JOHN DAVIES
CARPET FITTER

MAKE YOUR HACKSAWS WORK HARDER

PREPARATION

Clamp the workpiece securely in an engineer's vice. When cutting existing pipe work, ensure that water or gas has been safely turned off. When cutting thin sheet metal it is a good idea to sandwich it between two pieces of plywood for support. If the blade snaps in the middle of a cut restart the cut at the far edge to prevent the slightly thicker blade from jamming in the cut.

THE RIGHT BLADE AND TENSION

Clamp the workpiece securely in an engineer's vice. When cutting existing pipe work, ensure that water or gas has been safely turned off. When cutting thin sheet metal it is a good idea to sandwich it between two pieces of plywood for support. If the blade snaps in the middle of a cut restart the cut at the far edge to prevent the slightly thicker blade from jamming in the cut.

CUTTING METAL TUBING

This requires a fine-toothed blade at least 24 TPI. Commence the saw cut until the blade penetrates through the pipe wall. Continue to cut on the nearer wall of the pipe for a smoother vibration free cut, do this by rotating the pipe away from you.

CUTTING THICK ROD

When cutting thick rod or bars mark the cutting line all the way around. Make your first cut to the depth of the blade on the upper surface. Rotate the steel towards you and again cut to the depth of the blade. Continue until the cut is completed.

FINISHING THE CUT

With all types of cut support the waste material as you near the completion of the cut.

HAND SAWS

FATMAX® APPLIFLON HAND SAW

STANLEY
FATMAX

- Handle with marked 45° and 90° angles
- Appliflon coated blade for low friction and corrosion resistance
- 7 TPI allows cutting down and across grain
- 1 mm Wide blade for precision
- Hard point Jet Cut teeth
- Bi-material handle for comfort
- New Tri-Material Handle design combines Aluminum, ABS and TPR for maximum comfort and durability
- Triple-ground Tooth geometry cut on both the forward & backward stroke improving cutting performance by 30% compared to conventional saw tooth geometry
- Low friction PFTE blade coating reduces binding while in use
- Aluminum blade to handle assembly incorporates 45° and 90° Carpenter's Square Functionality

STANLEY	Length in mm	Nr of teeth / inch			
2-20-530	550	7	-	4	3253562205308

JET CUT FINE

STANLEY

- 11 Teeth/inch Jet Cut Fine
- Bi-material handle screwed and ultrasonically welded for comfort and security
- Teeth are precision set to generate clearance of kerf for the blade to cut on both the forward and back stroke increasing cutting efficiency by 30%
- 3 sided precision ground teeth offer razor sharp cutting edges at every stage of the stroke
- Induction hardened teeth stay sharper twice as long
- Handle allows cutting at 45 and 90°
- Blade steel Swedish quality, thickness: 0.85mm
- Ideal for finishing cut on wood and derived: skirting, plywood, melamines, PVC

STANLEY	Length in mm	Nr of teeth / inch			
2-15-594	380	11	-	6	3253562155948

JET CUT SAW HEAVY DUTY

STANLEY

- 7 Teeth/inch Jet Cut SP
- Bi-material handle screwed and ultrasonically welded for comfort and security
- Teeth are precision set to generate clearance of kerf for the blade to cut on both the forward and back stroke increasing cutting efficiency by 30%
- 3 sided precision ground teeth offer razor sharp cutting edges at every stage of the stroke
- Induction hardened teeth stay sharper twice as long
- Handle allows cutting at 45° and 90°
- Blade steel Swedish quality, thickness: 0.85mm
- Ideal for fast flow cut on wood and derived (laminated boards, panels, PVC...)

STANLEY	Length in mm	Nr of teeth / inch			
2-15-289	550	7	-	6	3253562152893

OPP SHARPTOOTH SAW

STANLEY

- Features & benefits in icon with some text
- 1 x Colour blade printing
- Screwed handle for security
- 2 Colour non lingual packaging
- Ultrasonically welded handle with soft TPE over-molded grip
- 3 Screws with self locking nuts for extra security
- Hardened Jetcut teeth for durability
- Fine ground polished steel blade with lacquer
- Soft grip handle for improved comfort and control
- 3 sided precision ground teeth offer razor sharp cutting edges at every stage of the stroke

1-20-095	550	11	-	10	3253561200953

SPECIALIST SAWS

FATMAX® FLOORBOARD SAW

STANLEY
FATMAX

- ABS Plastic Handle - Tough and hardwearing
- 45° and 90° Angle - Quick reference point for cuts
- Teeth on curved end of blade helps to start off a cut in floorboards
- 13 teeth per inch / 25.4mm
- Induction hardened teeth lasting twice as long as previous product
- Finger rest - Ergonomic design, useful for extra control when starting a cut
- Bi-material handle screwed and ultrasonically welded for comfort and security
- Bi-Material handle - For improved grip and comfort

STANLEY	Length in mm	Nr of teeth / inch			
2-17-204	300	13	X	6	3253562172044

FATMAX® TENON SAW

STANLEY
FATMAX

- 11 and 13 teeth per inch for a fine finish
- ABS Plastic Handle - High Strength and long lasting
- Handle with marked 45° and 90° angles
- 3 sided precision ground teeth offer razor sharp cutting edges at every stage of the stroke
- Induction hardened teeth stay sharper twice as long
- Reinforced back for extra rigidity, makes a straighter cut
- Finger rest - ergonomic design, useful for extra control when starting a cut
- Bi-material handle screwed and ultrasonically welded for comfort and security
- Bi-Material Handle - For improved grip and comfort

STANLEY	Length in mm	Nr of teeth / inch			
2-17-202	350	13	X	6	3253562172020

FATMAX® COMPASS SAW

STANLEY
FATMAX

- 11 teeth per inch for a fine finish
- ABS plastic handle - Tough and hardwearing
- Induction hardened teeth stay sharp twice as long
- 3 sided precision ground teeth offer razor sharp cutting edges at every stage of the stroke
- Fine teeth - Easier to start off cuts and control for detail work
- Finger rest, ergonomic design, useful for extra control when starting a cut
- Bi-material handle screwed and ultrasonically welded for comfort and security
- Bi-Material handle - For Improved grip and comfort

STANLEY	Length in mm	Nr of teeth / inch			
2-17-205	300	9	X	6	3253562172051

FATMAX® PVC SAW

STANLEY
FATMAX

- 11 teeth per inch
- 1mm Blade thickness for increased accuracy of cut
- Pull saws teeth - Easier to start off and control
- 30°/90° marking feature at the end of the blade
- Induction hardened teeth for long lasting cutting life
- Un-set Teeth - Creates less burrs when cutting
- Finger rest - ergonomic design, useful for extra control when starting a cut
- Bi-material handle screwed and ultrasonically welded for comfort and security
- Bi-Material handle - For improved grip and comfort
- Saw adapted to cut PVC and ABS

STANLEY	Length in mm	Nr of teeth / inch			
2-17-206	300	11	X	6	3253562172068

JET CUT PLASTERBOARD SAW

STANLEY

- Hand saw 7 teeth/inch with notches of release for sawing plasterboard panels and blocks
- Bi-material handle screwed and ultrasonically welded for comfort and security
- Induction hardened teeth stay sharper twice as long
- Aggressive teeth with three bevels for a faster and cleaner cut
- 7 teeth per inch with notches of release
- Handle with marked 45° and 90° angles
- Blade steel Swedish quality, thickness: 0,85mm
- Ideal to saw the plasterboard panels and blocks

STANLEY	Length in mm	Nr of teeth / inch			
2-20-037	550	7	-	6	3253562200372

FATMAX® FOLDING JABSAW

STANLEY
FATMAX

- 8TPI blade – ideal to cut through plasterboard
- 3 sided JetCut tooth cuts on the push and pull stroke – 50% faster than traditional tooth designs
- 3 locking positions -90, 135, 180 degrees - ideal for corner or ceiling cuts / better leverage
- Ultra hard tooth with sharpened tip to punch through plasterboard
- Locking mechanism locks blade in open and closed positions for safety and convenience
- Fold away storage – for safety
- Soft grip handle – for comfort

NEW

FATMAX® MULTI SAW WITH RECIPROCAL AND HACK BLADES

STANLEY
FATMAX

- Designed for sawing in confined spaces
- Works with any standard reciprocal or hacksaw blades
- Includes both wood cutting and metal cutting blades
- New ergonomically designed cushion grip handle for comfort
- Durable tension nut quickly and easily allows blade changes

STANLEY				
0-20-220		X	6	3253560202200

FATMAX® MINI FLUSH CUT PULL SAW

STANLEY
FATMAX

- Designed for trimming through Tenon or lap joints
- New ergonomically designed cushion grip handle for comfort
- Flexible blade for flush cutting plugs and dowels
- Double sided blade for convenient cutting from the left or the right
- 23-point tooth geometry cuts quickly and cleanly on the pull stroke
- Application for veneer and wooden pegs

STANLEY	Length in mm	Description

CHISELS, PLAN

ES

**AND
SURFORM®**

THE PRO'S ADVICE

JOHN DAVIES
CARPET FITTER

MAKE YOUR CHISELS WORK HARDER

VERTICAL PARING

STEP 1 Vertical paring is the means of cutting wood, across the grain, with the chisel in an upright position using hand power or light striking with a mallet. This skill is important in cutting parts of most commonly used wood joints and for trimming material back to a cut line. Take particular care when paring with the grain, as there is strong possibility of splitting.

STEP 2 Secure the work to the bench with a C clamp taking care to place a piece of scrap material between the work piece and the bench to avoid damage.

STEP 3 For the right handed user hold the chisel blade in a penhold grip, index finger at the front with the back of the blade supported by the third finger and thumb resting on the left hand edge of the blade around 25mm back from the cutting edge, or in a position that also enables the little finger and edge of the hand to rest on the work piece. The left hand grips the handle with the thumb uppermost.

STEP 4 Aim to remove only a very small amount of material at each pass of the chisel; depending on the hardness of the wood and the sharpness of the chisel you should remove no more than 0.5 to 1.0mm at each cut.

STEP 5 If you are cutting back to a knife marked line, ensure that you hold the chisel perfectly vertically and always lever forward away from the marked line to ensure that the defined edge of the cut is not bruised or rounded over. To add a little more power to the cut push down on the end of the handle with the right shoulder.

STEP 6 Finally when there is no more than 0.5mm to remove place the widest chisel available in the knife cut and apply pressure vertically until you reach the bottom of the cut. If you attempt to cut too much at this stage there is a risk that the chisel will be forced back over the line.

THE PRO'S ADVICE

JOHN DAVIES
CARPET FITTER

MAKE YOUR CHISELS WORK HARDER

HORIZONTAL PARING

STEP 1 Horizontal paring is the technique of removing waste material once the limits of the cut have been defined by either sawing or vertical paring with a chisel. By following this procedure the risk of damaging splits is minimised.

STEP 2 Secure the work in a vice or clamp to the bench.

STEP 3 For the right-handed person grip the handle of the chisel with the end tucked into the palm of the right hand and the thumb and index finger on either side of the handle. The right hand applies the power to the cut. Tuck your elbow into your side to give you more controlled power.

STEP 4 The left hand controls the precision of the cut either by placing the four fingers of the left hand on top of the blade and the thumb underneath, or for very fine work place the thumb on top and index finger of the left hand underneath close up to the cutting edge.

STEP 5 Before making any horizontal cut across or down the grain always ensure that you have sawn down to depth before you start to remove the waste material. To minimise the risk of splitting at the far edge of a through housing it is a good technique to work in from both sides to the middle.

NOTE: Take care when setting out your cutting lines to use a knife cut or a gauged line, this is more accurate than a pencil line.

TIP 1 If you have to strike the chisel it is much better to use a mallet than a hammer, because the larger striking face of the mallet can be brought down on the end of the handle without having to look at it, leaving you to concentrate on what the cutting edge is doing.

TIP 2 With only a few exceptions the chisel should be used with the bevel facing upwards or away from the user.

TIP 3 If you need to use a mallet when making a series of vertical cuts position the work over the leg of the bench to minimise vibration and to work more effectively.

TIP 4 Resist clamping the work in a vice unless you have supported the underside. Do not be tempted to use a hammer or mallet on wood held in the vice.

TOP TIP Drill out waste material from deep mortises before 'cleaning up' with a chisel.

WOOD CHISELS

FATMAX® SIDE STRIKE CHISEL

STANLEY
FATMAX

- NEW cutting edge on side of blade for demolition
- Work, also allows the chisel to double as a spokeshave
- Hardened strike cap and strike surface for durability
- Steel core for strength & durability
- Hardened, tempered carbon chrome steel blade for edge retention
- Curved bi-material handle, for comfort and protection
- Long series blade for strength and control

1-12-003	240	44	X	1	5000366120034
1-12-004	250	50	X	1	5000366120041

PLANES

The Stanley range of planes covers all your likely needs and they all feature the finest hardened, tempered and precision ground chrome carbon alloy steel cutters. As a general guide the longer and wider the plane the truer the surface along the length of the timber will be.

BAILEY® PROFESSIONAL JACK BENCH PLANES

STANLEY

- Professional fully adjustable metal plane
- General purpose bench plane for workshop, site or fine finishing
- 50mm blade width
- Kidney shaped lever cap screw hole prevents accidental slippage of cutter
- Chrome carbon steel cutter hardened and tempered to retain a keen cutting edge
- Fully adjustable frog for all tasks and timber types
- Virtually unbreakable polypropylene handle and knob shaped for comfort
- Finger tip adjustment for depth of cut and cutter alignment
- Tight fitting spring steel cap iron for perfect shaving flow
- Precision cast fine grey iron base for stability and wear resistance

STANLEY	Iron length in mm	Iron width in mm			
1-12-005	355	50	X	1	5000366120058

NO4 BENCH PLANE

STANLEY

- Wooden FSC cherry handle provides comfort
- Easy use solid, brass adjustments allow smooth operation
- Ductile iron base/casting
- Can be used with different types of wood
- A2 Steel blade for better edge retention
- Thicker 3mm blade reduces chatter
- Mouth adjustment
- Good for all round use

STANLEY	Iron length in mm	Iron width in mm			
1-12-136	250	50	-	1	3253561121364

HANDYMAN BENCH PLANES

STANLEY

- 1-12-204 for workshop, site or finishing work
- 1-12-205 for rapid stock removal prior to commencing assembly work
- 50mm blade width
- Kidney shaped lever cap screw hole prevents accidental slippage of cutter
- Chrome carbon steel cutter hardened and tempered to retain a keen cutting edge
- Fully adjustable frog for all tasks and timber types
- Virtually unbreakable polypropylene handle and knob shaped for comfort
- Finger tip adjustment for depth of cut and cutter alignment
- Tight fitting spring steel cap iron for perfect shaving flow
- Precision cast fine grey iron base for stability and wear resistance

STANLEY	Iron length in mm	Iron width in mm			
1-12-203	240	44	X	1	5000366122038
1-12-204	250	50	X	1	5000366122045

N°78 REBATE PLANE

STANLEY

- Cutter adjustable for depth of cut in the rear position
- Two cutter positions for regular and bull nose work
- Supplied with an adjustable fence depth gauge and cutting spur
- 38mm blade width
- Replacement iron available solely on request
- Black lacquered finish
- Die-cast stopping block and rectified right cheek
- Depth gauge and lateral guide for rebates
- 4 position barley grain
- Depth adjustment of the iron by a lever

STANLEY	Iron length in mm	Iron width in mm			
1-12-078	254	38	-	1	3253561120787

PLANES SB

STANLEY

- Light duty easily and simply adjusted smoothing plane
- 45mm blade width
- Kidney shaped lever cap screw hole prevents accidental slippage of cutter
- Chrome carbon steel cutter hardened and tempered to retain a keen cutting edge
- Fully adjustable frog for all tasks and timber types
- Virtually unbreakable polypropylene handle and knob shaped for comfort
- Finger tip adjustment for depth of cut and cutter alignment
- Tight fitting spring steel cap iron for perfect shaving flow
- Precision cast fine grey iron base for stability and wear resistance
- Precision ground base and sides ensure performance to the highest tolerances

STANLEY	Iron length in mm	Iron width in mm			
1-12-033	210	44	X	1	5000366120331
1-12-034	245	50	X	1	3253561120343

REPLACEABLE BLADE PLANE

STANLEY

- Lacquered finish
- Die-cast plate rectified on 3 sides
- Cutting depth adjustment and distortion lever
- Multi-use - Smoothing plane and workbench rebate plane
- Fully adjustable for depth of cut, cutter alignment
- Supplied with 6 easy to change blades placed in the rear handle

STANLEY	Length in mm	Iron width in mm			
1-12-100	260	50	X	1	5000366121000

RB 5 - REPLACEABLE BLADE BLOCK PLANE

STANLEY

- Lightweight diecast modelling plane with machined base
- Blade can be positioned for standard use or bull nose for working in corners
- Adjustable for depth of cut
- Rapid blade changing
- 50mm blade width
- Takes blades 12-376, 12-378, 12-379
- Supplied with 2 RB 108 blades
- Rectified plate
- Spare blades stored safely in handle
- Depth adjustment by wheel

STANLEY	Length in mm	Iron width in mm			
0-12-105	150	50	X	2	3253560121051

102 BLOCK PLANE

STANLEY

- Manually adjustable
- General purpose, ideal for model makers, craft and all light duty jobs
- 140mm has 35mm blade width
- 180mm has 40mm blade width
- Self-service box
- Die-cast stopping block
- Position of iron at 21°
- Manual adjustment of iron depth and distortion
- Black lacquered finish

STANLEY	Length in mm	Iron width in mm			
1-12-102	140	34	-	1	3253561121029

110 BLOCK PLANE

STANLEY

- Rectified cheeks
- General purpose, ideal for model makers, craft and all light duty jobs
- 140mm has 35mm blade width
- 180mm has 40mm blade width
- Lacquered aluminium stopping block
- Manual adjustment of iron depth and distortion
- Position of iron at 21°
- Black lacquered finish
- Manually adjustable

STANLEY	Length in mm	Iron width in mm			
1-12-116	180	40	X	1	3253561121166

BLOCK PLANE - ADJUSTABLE

STANLEY

- Small professional fine grey iron
- Black lacquered finish 40mm blade width
- Rectified cheeks
- Die-cast stopping block
- Distortion lever
- Rapid adjustment of iron depth
- Adjustable for depth of cut and alignment
- Gradient of iron at 21°

STANLEY	Length in mm	Iron width in mm			
1-12-220	178	40	X	1	3253561122200

SMOOTHING BLOCK PLANE - FULLY ADJUSTABLE

STANLEY

- Die-cast smoothing block plane
- Distortion lever
- Fully adjustable for depth of cut, cutter alignment and mouth opening
- Rapid adjustment - Iron depth wheel
- Black lacquered finish
- Rectified cheeks and lateral gripping grooves
- Die-cast stopping block
- Adjustable light for fine work or trimming
- For end grain and general purpose fine finishing work
- Iron positioned at 21°

STANLEY	Length in mm	Iron width in mm			
1-12-020	160	40	X	1	3253561120206

NO9 1/2 BLOCK PLANE

STANLEY

- Easy use solid, brass adjustments allow smooth operation
- Ductile iron base/casting
- Can be used with different types of wood and end grain
- A2 Steel blade for better edge retention
- Thicker 3mm blade reduces chatter
- Mouth adjustment

STANLEY	Iron length in mm	Iron width in mm			
1-12-138	160	40	-	1	3253561121388

BLOCK PLANE FULLY ADJUSTABLE LOW ANGLE

STANLEY

- For end grain and plastic laminates
- Low angle cutter
- Fully adjustable
- Iron inclined at 13°
- Black laquer finish
- Base : 150 mm
- Iron : 35 mm
- Sole and rectified cheeks of barrel

STANLEY	Length in mm	Iron width in mm			
1-12-060	152	34	X	1	3253561120602

NO60 1/2 BLOCK PLANE

STANLEY

- Easy use solid, brass adjustments allow smooth operation
- Ductile iron base/casting
- Highly effective when cutting end grain
- A2 Steel blade for better edge retention
- Thicker 3mm blade reduces chatter
- Mouth adjustment

STANLEY	Iron length in mm	Iron width in mm			
1-12-139	150	40	-	1	3253561121395

SPOKESHAVES 151

STANLEY

- Die-cast spokeshave
- Die-cast stopping block
- Replacement iron available solely on request
- Iron adjustable by 2 milled screws
- 12-152 has round base for concave surfaces
- 12-151 has flat base for flat and convex surfaces
- Fully adjustable for depth of cut and alignment by 2 milled screws
- Manual placement of the iron
- Base : 55mm
- Iron : 55mm

THE PRO'S ADVICE

JOHN DAVIES
CARPET FITTER

THE RIGHT PLANE FOR THE JOB

TRY PLANE, JOINTER/FORE PLANE

Ideal for truing the long edges of timber in readiness to join the edges together to produce a wide board as for a tabletop. The long plane sole bridges all of the high spots on the timber and ensures that these are removed first. The cutter must be absolutely square across its width.

JACK PLANE

The best choice for stock removal and preparation of timber from the sawn condition. To function properly the cutter is honed to a slight convex shape between 0.5 and 1mm at its maximum for rapid stock removal.

NO 4 SMOOTHING PLANE

Perfect for producing a fine finish to the surface, particularly if you are working in a hardwood with interlocking grain, that is when the structure flows in both directions and is roughed up by the plane at the same time as it is being smoothed just a few millimetres to the side. Its compact size also makes it a good general-purpose plane for trimming and fitting on the job site, but it tends to follow the undulations of the timber and so cannot be used to create true long surfaces.

BLOCK PLANES

Designed to accurately plane end grain. In this situation with a bench plane the cutter tends to vibrate or 'chatter', which can mark the surface, whereas with a block plane the vibration is reduced because the cutter works with the bevel uppermost. The range of 5 planes differs mainly in the type of adjustment offered. Stanley's top two products are fully adjustable for depth of cut, cutter alignment and mouth aperture, an often overlooked feature but which is critical to controlling the fineness of the cut. Other block planes in the range will work just as efficiently as the fully adjustable models but you will need to take more time to adjust them manually.

THE LOW ANGLE BLOCK PLANE

This is the best specialist end grain plane and it is also perfect for trimming the edges of decorative laminate; although you will need to hone the edge more frequently.

DUPLEX REBATE PLANE

So called because of the two cutter positions (standard and bull nose), it is designed to produce rebates.

THE PRO'S ADVICE

JOHN DAVIES
CARPET FITTER

MAKE YOUR PLANES WORK HARDER

HOW TO USE A BENCH PLANE

STEP 1 Fix the wood securely either against a bench stop on the bench top or in the bench vice.

STEP 2 For right handed person adopt a firm base with your left foot well forward and your right foot and right hip as close to the line of cut as possible. If you are right handed, hold the front knob in your left hand finger tips and grasp the rear handle with the right hand with the index finger resting on the shoulder of the cutter; this helps maintain consistent direction, particularly important when squaring edges.

STEP 3 Place the toe (the base of the plane in front of the mouth) on the near end of the wood and apply light downward pressure to maintain even contact with the wood. Push the plane forward with your right hand and transfer your body weight from right foot onto the left foot as the plane progresses. When the toe approaches the far end of the wood reduce the downward pressure with the left hand and increase the pressure with the right hand until the mouth and cutter are clear of the wood. This is a very important skill to acquire as the consequence of rocking the plane at the start and finish of the stroke will be a rounded surface.

STEP 4 At the end of each stroke it is better to lift the plane and return to the starting position rather than drawing it back over the wood, which could possibly dull the cutting edge prematurely.

HOW TO USE A BLOCK PLANE

When planing end grain always work to a cut line, which is extended around all four faces to minimise fraying. Remember that if you attempt to plane a full width of end grain you are very likely to split a piece off the far edge of the wood, to eliminate this risk plane in from both ends.

HOW TO USE A DUPLEX REBATE PLANE

STEP 1 Set the width of the rebate and set the depth of the required cut.

STEP 2 Start planing from the far end of the rebate and progressively work back to the near end. As you push the plane forward apply pressure on the heel with the right hand this will reduce the tendency for the cutter to 'dig in'.

TIP 1 It often helps to place the fingers of the left hand on the outer edge of the fence to help keep the plane in a perfectly upright position. For best result aim to produce a thin shaving as the absence of a cap iron to control the shaving demands more care from the user to produce a good result.

TIP 2 If you need to clean up a stopped rebate move the cutter and lever cap to the forward bull nosed position. Depth adjustment will have to be done by hand as the lever function is not available in the forward position.

SURFORM PLANES & BLADES

SURFORM METAL BODY CONVERTIBLE PLANEFILE

STANLEY

- Polypropylene handle and die cast alloy body for strength and durability
- Fitted with replaceable standard cut blade
- Can be set in two positions to be used as either a plane or a file
- Supplied with a blade for standard work 5-21-293
- Uses a 250 mm long blade
- Moulded handle
- Painted metal body
- Can be used as either a plane or a file

STANLEY	Blade length in mm	Length in mm			
5-21-122	255	310	X	2	3253565211221

SURFORM STANDARD METAL BODY PLANE

STANLEY

- Takes all types of blade that are 250 mm long
- Fitted with replaceable standard cut blade
- Used as a plane for trimming or levelling
- Grooved front leaning handle for greater precision
- Polypropylene handle and metallic-gray die cast alloy body for strength and durability
- Ideal for smoothing drywall or pypsum board, wood, plastic and metal surfaces
- High impact polymer handle up to heavy use

STANLEY	Blade length in mm	Length in mm			
5-21-296	255	315	X	2	3253565212969

SURFORM METAL BODY FLAT FILE

STANLEY

- Accepts all types of 250 mm long blades - for versatility
- Knurled thumb grip for precision
- Grooved front leaning handle for greater precision
- For use with push or pull action depending on direction of blade installation
- Strong heavy-duty metal body with rear removable robust handle in yellow polypropylene

STANLEY	Blade length in mm	Length in mm			
5-21-295	255	440	X	2	3253565212952

SURFORM ROUND FILE

STANLEY

- For enlarging holes and shaping tightly curved surfaces
- Tough Polypropylene handle for strength and durability
- Fitted with replaceable blade
- Thumb grip - for comfort and ease of use
- Metal body with robust yellow polypropylene handle with only one space
- Uses a 250 mm long blade (21-291)

STANLEY	Blade length in mm	Length in mm			
5-21-297	250	365	X	2	3253565212976

SURFORM METAL BODY BLOCK PLANE

STANLEY

- 140 mm long blade
- Fitted with replaceable fine cut blade - ideal for edges and confined work spaces
- Thumb screw for quick blade release - no tools required
- Practical and handy - It can be used with a single hand
- Instant mounting and dismounting of the blade using a wing nut
- Strong heavy-duty metal body for strength and durability

STANLEY	Blade length in mm	Length in mm			
5-21-399	140	155	X	2	3253565213997

SURFORM MOULDED BODY PLANE

STANLEY

- Uses all types of 250 mm long blades
- Fitted with replaceable standard cut blade - ideal for general purpose use
- Very handy
- Instant mounting and dismounting of blade
- Thumb screw for quick blade release - no tools required
- General purpose use
- Lightweight plastic moulded body for strength and durability

STANLEY	Blade length in mm	Length in mm			
5-21-103	255	270	X	6	3253565211030

SURFORM MOULDED BODY BLOCK PLANE

STANLEY

- Uses all types of 140 mm long blades
- Fitted with replaceable fine cut blade - ideal for edges and confined work spaces
- Can be operated with a single hand and is therefore very easy to use
- Instant mounting and dismounting of blade
- Thumb screw for quick blade release - no tools required
- Lightweight plastic moulded body for strength and durability

STANLEY	Blade length in mm	Length in mm			
5-21-104	140	155	X	6	3253565211047

SURFORM MOULDED BODY FLAT FILE

STANLEY

- Lightweight plastic moulded body for strength and durability
- Compact tool with curved blade for increased stock removal
- Works on pull stroke
- Simple click on blade replacement - no tools required
- Uses all types of 140 mm long blades
- Very handy
- Instant mounting and dismounting of blade
- Advantageously replaces a traditional file for many jobs

STANLEY	Blade length in mm	Length in mm			
5-21-102	140	300	X	6	3253565211023

SURFORM MOULDED BODY SHAVER TOOL

STANLEY

- Lightweight plastic moulded body for strength and durability
- Compact tool with curved blade for increased stock removal
- Works on pull stroke
- Simple click on blade replacement - no tools required
- Moulded handle which is practically unbreakable
- Uses the 65 mm long 21-515 blade
- Curved blade which is interchangeable by simple clicking in

STANLEY	Blade length in mm	Length in mm			
5-21-115	65	185	X	6	3253565211153

STANDARD CUT BLADE

STANLEY

- Standard cut blade features teeth flush to the blade edge for working into edges
- Use on wood, vinyl, plaster thermalite, fiberglass and linoleum
- Will fit; 21-122, 21-295, 21-296, 21-103
- Specially for soft metals, hard plastics, laminates, etc
- 250 mm standard flat blade for trimming work

STANLEY	Length in mm	Width in mm			
5-21-293	250	42	X	12	3253565212938

SURFORM FINE CUT BLADE

STANLEY

- For fine finishes on hard wood, end grain and some soft metals
- 5-21-398 fits 21-399, 21-102 and 21-104

STANLEY	Length in mm	Width in mm			
5-21-398	140	42	X	12	3253565213980
5-21-393	250	42	X	12	3253565213935

SURFORM HALF ROUND BLADE

STANLEY

- Will fit 21-122, 21-295 21-296 and 21-203
- For fast stock removal and shaping curved surfaces
- Will fit all 250mm surform frames
- Adapts to SURFORM, 21-122 file plane, 21-295 flat plane, 21-297 standard plane and the 21-103 plane

STANLEY	Length in mm	Width in mm			
5-21-299	250	39	X	12	3253565212990

SURFORM METAL AND PLASTICS BLADE

STANLEY

- Will fit 21-122, 21-295 21-296 and 21-203
- Will fit all 250mm surform frames
- Special flat blade for soft metals and plastics
- Adapts to SURFORM, 21-122 file plane, 21-101 flat file and the standard 21-107 and 21-103 planes

STANLEY	Length in mm	Width in mm			
5-21-508	250	42	X	12	3253565215083

SHAVERTOOL BLADE

STANLEY

- For fast stock removal
- Will fit 21-115
- Works on pull stroke
- Small curved blade for trimming work

STANLEY	Length in mm	Width in mm			
5-21-515	63	42	X	12	3253565215151

SURFORM ROUND BLADE

STANLEY

- Fits the round SURFORM file plane (21-207)
- Will fit 21-297
- 250mm round blade for enlarging holes and shaping tight curved surfaces

STANLEY	Length in mm	Width in mm			
5-21-291	250	15	X	6	3253565212914

DEMOLIT HAM

ION, MERS AND COLD CHISELS

THE PRO'S ADVICE

JOHN DAVIES
CARPET FITTER

THE RIGHT DEMOLITION TOOL FOR THE JOB

WRECKING BARS

Heavy duty demolition tools constructed from spring steel for extreme strength and durability. Precision ground edges provide better access with wider prying edges. They also weigh less than traditional pry bars.

WONDER BARS

Extremely useful prying, nail pulling and levering tools in a wide range of sizes.

DEMOLITION & RIPPING BARS

Forged hook and claw ended bars capable of undertaking the heaviest of demolition jobs.

PRECISION PRY BARS

Shorter bars for close work, including some with extra wide levering surfaces to spread the load, which enable you to carefully lever off existing mouldings and trim with minimal collateral damage. These are perfect tools for the kitchen fitter and interior decorator.

THE PRO'S ADVICE

JOHN DAVIES
CARPET FITTER

THE RIGHT HAMMER FOR THE JOB

XTREME ANTI-VIBE

In all cases, especially where it is intended to use a hammer for prolonged periods, you should choose an Xtreme Anti-Vibe model, which virtually eliminates all vibration.

CLAW HAMMERS

There are two types of claw hammer, the ripping or straight claw and the joiners or curved claw. The ripping claw is ideal for pulling up floorboards or ripping out unwanted studwork, whilst the curved claw is better for pulling nails.

The striking face should be fully hardened and slightly convex to resist wear, whilst the outer circumference of the head should be 'rim tempered' (slightly less hard) in order to minimise the possibility of small fragments flying off, if struck against an even harder surface.

Look carefully for a claw that is precision ground on the outer facing edges. The claw must be hardened and preferably tempered in oil to create a tougher structure that will bite into the shank of a nail and also resist fracture. The true test of a quality claw hammer is its ability to pull a nail by gripping the shaft, not by hooking under the head of the nail.

MAGNETIC NAIL HOLDER

The magnetic nail holder on the Xtreme hammer is invaluable when you want to insert a nail in a hard to reach position where it is just not possible to hold the nail in your hand.

USE THE RIGHT WEIGHT OF HAMMER

Choosing the right weight is important, because there is no benefit in lifting a 22oz hammer to drive nails no longer than 50mm (2"). In the same way a 16oz hammer will make heavy work in driving a 75mm nail. As a reasonable compromise a 20oz claw hammer is a good general-purpose choice.

CROSS PEIN HAMMERS

The Warrington cross pein is a much lighter hammer available in weights from 6oz to 12oz and the cross pein is useful in starting the nail off. For very fine panel pins choose the pin hammer, which has a longer handle and smaller diameter striking face.

BALL PEIN

These hammers are used mainly in engineering and automotive applications. The ball pein end has several functions, but mainly used for swaging rivets.

CLUB & DRILLING HAMMERS

This should be your only choice if you intend to strike a cold chisel. The striking face of the hammer must be larger than the chisel to be struck, otherwise there is a serious risk of injury from flying metal splinters.

SPECIALIST HAMMERS

Stanley also offer a range of specialist hammers including brick hammers, sledge hammers, a dual purpose hammer/hatchet and a drywall hammer designed for plasterboard installation.

THE PRO'S ADVICE

JOHN DAVIES
CARPET FITTER

MAKE YOUR HAMMERS WORK HARDER

GRIP AND STANCE

Hold the handle near to the end of the grip so that your little finger rests up against the 'hook' shape at the extremity of the handle; this will enable you to maintain a secure grip without having to use all the strength in your hand to hold on. For best performance a right-handed user should place the left foot forward and the right foot set back a little and at right angles to the left. Move the position of your feet to adjust the height of your shoulders; ideally you need to be striking the head of the nail horizontally. If your right hand is too low you will tend to bend the nail away from you and if too high it will bend towards you.

HOLD THE NAIL UNTIL FIRMLY SET

Position the nail and while still holding it in place tap it a few times to set it firmly into the wood, at least 12mm for a 75mm nail, then raise the hammer a little higher and strike more firmly until the nail is flush.

WITHDRAWING A NAIL

This can be done with a claw hammer in two ways; either by hooking the nail head into the claw of the hammer or by making the claws bite into the shank of the nail. If you are pulling a long nail it is best to engage the nail as near to the point where it enters the wood, place a piece of waste material under the front curve of the head to avoid damaging the wood, then lever toward you gently, avoid jerking on the handle. As the nail emerges either reposition the claw lower down the shaft or insert a thicker piece of scrap to ensure that you continue to pull the nail vertically.

FINISHED TRIM OR BENCH WORK

Take care not to damage the surface by over hitting the nail. Use a Stanley Nail Set to drive pointed head panel pins flush or even below the surface. The countersunk pin can then be filled for a perfect, invisible fixing.

SMALL PANEL PINS

Small panel pins are hard to hold in place when starting. To make it easier press the pin through a piece of cardboard, hold it in position with your fingers a safe distance away and then tap the pin in place removing the card at the last minute. There are many other devices both commercial and improvised that will serve the same purpose.

SAFETY

- Never strike anything with the cheeks of the hammer head, because they are not hardened
- For hardened masonry nails use a club hammer and never a normal nail hammer
- Only use a club hammer for striking cold chisels and always wear safety goggles and gloves
- When striking cold chisels or punches the hammer head should be at least 10mm larger than the area to be struck
- With a new hammer it's a good idea to remove the protective lacquer on the striking face with medium grit glass paper in order to reduce the risk of the hammer slipping off the nail head

1-55-516	38.1	-	4	3253561555169

SUPER WONDER BAR® PRY BAR

STANLEY

- High visibility, powder coated finish
- Patented, arched center gives more swing during nail pulling – no need for a wood block
- Polished tips and bevelled nail slots for high performance
- Polished and beveled cutting edges for easy lifting and ripping
- Contoured bar makes pulling nails, prying and lifting easier
- Forged, high carbon steel for increased steel and durability
- Heat treated, forged high carbon steel for increased durability

STANLEY	Length in cm			
1-55-525	38	-	4	3253561555251

WONDER BAR® PRY BAR

STANLEY

- High visibility, powder coated finish
- Polished tips and bevelled nail slots – excellent for pulling nails, lifting or prying
- Polished and beveled cutting edges
- Contoured bar makes pulling nails, prying and lifting easier
- Forged, high carbon steel for increased steel and durability
- Heat treated, forged high carbon steel for increased durability

STANLEY	Length in cm			
1-55-515	32	-	4	3253561555152

WONDER BAR® X21 PRY BAR

STANLEY

- Excellent for pulling nails, lifting or prying
- 53cm/21" long for better reach and greater leverage
- Contoured bar makes pulling nails, prying and lifting easier
- Polished tips and bevelled nail slots – excellent for pulling nails, lifting or prying
- Forged, high carbon steel for increased steel and durability
- High visibility, powder coated finish
- Heat treated, forged high carbon steel for increased durability

STANLEY	Length in cm			
1-55-526	53	-	4	3253561555268

FATMAX® MOLDING BAR

STANLEY FATMAX

- Spring Steel for durability
- Polished, beveled claws allow precision nail pulling and prying
- Non-slip material for better leverage
- Hi-visibility yellow
- Flat striking face allows claw to be driven under deeply embedded nails
- Forged high carbon alloy steel for long life

STANLEY	Length in cm			
1-55-510	25	X	2	3253561555107

FATMAX® CLAW BAR

STANLEY
FATMAX

- Spring Steel for durability
- Polished, beveled claws allow precision nail pulling and prying
- Non-slip material for better leverage
- Hi-visibility yellow
- Flat striking face allows claw to be driven under deeply embedded nails
- Forged high carbon alloy steel for long life

STANLEY	Length in cm			
1-55-511	25	X	2	3253561555114

MOLDING BAR

STANLEY

- Heat treated, forged high carbon steel for increased durability
- Available in 8" and 10"
- Polished, beveled claws allow precision nail pulling and prying
- Flat surface allows users to cleanly pry molding and trim reducing material damage
- High visibility, powder coated finish
- Contoured bar makes pulling nails, prying and lifting easier
- Heat treated for increased durability

STANLEY	Length in cm			
0-55-116	20	X	2	3253560551162
0-55-117	25	X	2	3253560551179

CLAW BAR

STANLEY

- Heat treated for increased durability and resistance to bending
- Heat treated, forged high carbon steel for increased durability
- Polished bevelled claws allow precision nail pulling and prying
- Polished, beveled claws allow for precision nail pulling and prying
- Flat striking face allows claw to be driven under deeply embedded nails
- Contoured bar makes pulling nails, prying and lifting easier
- High visibility, powder coated finish

STANLEY	Length in cm			
0-55-114	25	X	2	3253560551148

CROWBAR

STANLEY

- Made of forged and tempered steel for extra solidity
- Bevelled-nail groove at each tip for greater effectiveness

STANLEY	Length in cm			
1-55-155	50	-	6	8001140551553
1-55-157	70	-	6	8001140551577

COLD CHISELS & PUNCHES

FATMAX® COLD CHISEL

STANLEY
FATMAX

- Powder coat finish for increased visibility
- Bi-material hand guard for increased comfort and protection from overstrike
- Modified parabolic striking end for greater resistance to mushrooming and chipping
- Hardened, quenched & tempered to precise specifications for added safety
- Stanley blade holds its edge longer so saves time re-sharpening
- Forged from chrome vanadium steel for increased strength and durability and less grinding

STANLEY	Width tip in mm	Length in mm			
4-18-332	25	305	-	3	3253564183321

FATMAX® ELECTRICIAN'S CHISEL

STANLEY
FATMAX

- Bi-material hand guard for increased comfort and protection from overstrike
- Modified parabolic striking end for greater resistance to mushrooming and chipping
- Hardened, quenched and tempered to precise specifications for added safety
- Stanley blade holds its edge longer so saves time re-sharpening
- Forged from chrome vanadium steel for increased strength and durability and less grinding
- Powder coat finish for increased visibility

STANLEY	Width tip in mm	Length in mm			
4-18-330	55	254	-	3	3253564183307

COLD CHISEL

STANLEY

- Quality chrome vanadium steel
- Quenched and tempered to precise specifications for added safety
- Increased strength and durability for all metalwork tasks from chipping and shaping
- One-piece construction forged from quality chrome vanadium steel for increased strength and durability
- Powder coat finish for increased visibility

STANLEY	Width tip in mm	Length in mm			
4-18-290	22	203	-	3	3253564182904

6 PIECE PUNCH KIT

STANLEY

- Powder coat finish for increased visibility
- Quality chrome vanadium steel
- Increased strength and durability for retained accuracy when marking out centre lines, hole locations and pilot drill starting points
- One-piece construction forged from tempered tool steel for strength
- Quenched & tempered to precise specifications

STANLEY	Set description

FATMAX® HAMMER PERFORMANCE FROM THE INSIDE OUT

We've carried out extensive research when developing our latest range of ANTIVIBE™ hammers. New vibration dampening technology ensures ultimate protection against hand and arm stress and yet delivers more striking power than traditional designs. The unique ANTIVIBE™ collars absorb potentially harmful shockwaves transferring additional power into every strike. Giving you the ultimate power and control.

HAMMERS- CONSTRUCTION

FATMAX® PRO WELDED FRAMING HAMMER

STANLEY
FATMAX

- 100% steel for strength and durability
- Magnetic nail starter for hands free use
- Light weight design reduces arm stress
- 75% larger strike face for bigger sweet spot and better accuracy
- Exclusive dual tempered head rims & claw reduces steel chipping & cracking
- 15oz Framer that swings like a 28oz

STANLEY® GRAPHITE CLAW HAMMER

STANLEY

- 5 times fewer vibrations than a wooden handle
- Flat head and sharp angles
- Handle cannot be removed thanks to its exclusive unbreakable head-handle link
- Superior shock resistance compared with traditional handle materials
- Available in 16oz and 20oz
- Vibration dampener through the combination of a flexible elastomer coating and a graphite core
- Comfortable slip resistant grip
- Fully heat treated and rim tempered striking face for strength and safety
- Full length graphite core shaft for maximum strength and balance

STANLEY	Weight head in g	Length in mm			
1-51-505	450	350	-	4	3253561515057

SLEDGE HAMMER
STRENGTH WHERE YOU NEED IT

You told us that you need a sledge hammer that delivers the ultimate striking force with minimum effort. So we combined the very latest ANTIVIBE™ technology and glass fibre handle designs with a specially shaped bullet head for maximum performance. You can now get the job done quicker. And use less effort than with competitor hammers.

HAMMERS- CLUB & SLEDGE

FATMAX® VIBRATION DAMPING MINI SLEDGE HAMMERS

STANLEY
FATMAX

NEW

- Particulate filled fiberglass core absorbs vibrations and shock on impact
- Overmolded high impact polypropylene jacket for additional durability and overstrike protection
- FatMax AntiVibe shock absorbing layer that helps reduce vibrations in the handle
- Durable rubber overmold for long lasting, slip resistant grip
- Shock absorbing collar isolates vibrations to the head and reduces shock through the handle on impact
- Forged hammer head permanently bonded to the handle for durability with bullet nose design provides 2x more concentrated striking force

1-54-924	1500	52	45	-	4	3253561549243

TWO-HANDED HAMMERS WOODEN HANDLE - ROUNDED ANGLES

STANLEY

- Low angles
- Straight handle setting
- Conforms to DIN 6475 standards
- Unbreakable due to a permanent attachment of the sleeve to the head using an epoxy resin – for better safety
- Tempered steel head for longevity
- Ash wood handle for longevity and balance
- Flat head and cut angles for improved resistance
- Flat head and low angles to increase safety
- Generally used with an intermediate tool : pin, cold chisel, bricklayer's chisel, ...

HAMMERS- COMPO CAST

COMPO-CAST® STANDARD HEAD SOFT FACE HAMMERS

STANLEY

- Steel reinforced handles provide added strength and safety, resist breaking on overstrike
- Soft face doesn't mar surfaces or equipment
- No exposed metal
- Non sparking soft face hammers
- Reduced noise due to the sledgehammer being completely coated
- Urethane allows the pane to resume its shape after the shock
- Compo-Cast® does not damage items thanks to its construction in overmoulded urethane
- Anti-rebound thanks to hundreds of steel balls which move inside the head and absorb the energy following the shock

CLAM

PS

AND

PLIERS

THE PRO'S ADVICE

JOHN DAVIES
CARPET FITTER

MAKE YOUR CLAMPS WORK HARDER

DO A DRY RUN

Before 'gluing up' even the simplest of structures it is always good practise to have a 'dry run' to be sure that all the joints fit well and that the clamps are adjusted to require only minimal tightening and adjustment when you have everything glued.

TAKE CARE IN POSITIONING CLAMPS

Ensure that the clamping force is through the line of the joint and that the clamp is square to the material.

SPREAD THE CLAMPING LOAD EVENLY

When clamping up wide carcasses put a rigid piece of wood between the clamping pads. It's even better if the wood is slightly convex, because this will spread the effect of the clamp more evenly across the joint and ensure a better finish. The best way to do this is to hold the two pieces of wood in position with a small 'G' or 'F' clamp leaving both hands free to accurately position the large bar clamps.

TIGHTEN THE CLAMPS PROGRESSIVELY

Depending on the complexity of the job you could be working with four, or even eight bar clamps at the same time, so your aim is to bring all the joints together at the same moment, without any undue stress to the job.

CHECK THE CLAMPED JOB IS SQUARE

Once you have closed up all the joints, the best way to check that the job is square is to measure the diagonals with a steel rule.

Alternatively, use two thin pieces of wood sharpened to an edge and stretched across the diagonals of the frame. Mark a line across the two pieces of wood and then compare the diagonal dimension across the other corners. You should be able to make any minor adjustments required by slightly changing the position of the clamps.

HOW TO JOIN WIDE BOARDS

For gluing together wide boards edge to edge (rubbed joint) adjust the opening to include the protective scrap of wood and lay the clamps on the bench or floor. Place the glued boards on top of the steel bars of the clamps with scraps of paper protecting the steel bars from the glue. You should only need light pressure. If the size of the job requires more than two clamps alternate with one on the upper side. As you apply the pressure check that the boards remain flat on the bars of the clamps; if they don't it probably means that the edges are not square.

USING CLAMPS TO OPEN JOINTS

A very important feature of many clamps in the range is the ability to turn the clamping heads around and use the clamp to push surfaces apart. Often when testing joints on a dry run they may stick too well. To separate them with a hammer could cause damage, but with our clamps you can reverse them, which enables you to open the joints in a controlled way.

THE PRO'S ADVICE

JOHN DAVIES
CARPET FITTER

THE RIGHT PLIERS FOR THE JOB

WIRE CUTTING

Pliers do not cut by shearing, as scissors do, they cut wire by partially cutting and finally 'separating' the wire. The cutting edges should be precision ground, but the actual edge should be filed flat to separate rather than cut.

COMBINATION PLIERS

For gripping and cutting these are indispensable and should be found in every tool box. The 180mm long model is probably the most versatile.

DIAGONAL AND END CUTTERS

For wire cutting only. The Maxsteel models are made to demanding DIN/ASO/ANSI and are capable of cutting hard steel wire. The end cutter can exert a higher leverage than the diagonal and is easier if you have a lot of repetition cutting of hard wire.

STRAIGHT AND CRANKED LONG NOSE PLIERS

The long gripping nose is rounded and very useful for twisting electrical wire to make good contacts. Long nose pliers also have a cutting edge suitable for copper and fine gauge soft steel. The 160mm model is compact and easy to use.

VDE RANGE

Offers additional safety in electrical applications with 1000v rated handles, safe live line working, with handles tested up to 10,000v.

WATER PUMP PLIERS

Featuring adjustable jaw capacities, they are ideal for plumbing when it comes to working on large size flange nuts. The specially fluted jaw profile also helps grip piping securely.

SLIP JOINT PLIERS

A general purpose gripping tool with smaller adjustable jaw capacities than Water Pump Pliers, but with the added feature of a wire shear built into the jaw. A very useful and adaptable tool for any toolbox.

'MOLE' LOCKING PLIERS

Available with straight and curved jaws suitable for locking onto flat surfaces such as nuts and bolts or metal bars.

TRIGGER CLAMP

FATMAX® AUTO TRIGGER CLAMPS

STANLEY
FATMAX

- Patent pending spring closure mechanism – probably the fastest trigger clamp in the world
- Constant clamping force of 140kg
- NEW! - 20% larger throat depth than current FM and Irwin trigger clamps
- Reinforced nylon and steel construction provides strength and durability
- Light & ergonomic design
- Dual pivot trigger offers fast closing and high clamping force
- Easy adjustment release
- Constant clamping force
- Increased clamping pressure
- Removable jaw pad protect surfaces from marring and damage
- beam bar for strength
- Easily convertible from clamp to spreader
- Quick and easy clamping operation
- Quick release button for speed
- NEW! - 20% larger throat depth than current FM and Irwin trigger clamps

STANLEY	Throat Depth (mm)	Clamping Capacity (mm)	Spreading capacity (mm)			
9-83-123	110	150	410	-	4	3253569831234

BOLT CROPPERS

FORGED HANDLE BOLT CROPPERS

STANLEY

- Efficient and minimum effort cutting up to a maximum of 160Kg/mm2 at Ø 10mm
- Drop forged chrome molybdenum steel jaws for durability and strength
- Forged parts for strength
- Forged handles for strength
- Choice between two types of blades: axial or flush cut
- Excentric screws for quick and easy adjusting of the blades
- Protection of excentric screws against unscrewing
- Spare part heads supplied with screws
- Comfortable ergonomic grips with guards, resistant to solvents
- Very good visibility on worksites thanks to the yellow body finish and phosphate jaws

MAXSTEEL AVIATION SNIPS STRAIGHT AND LONG CUT

STANLEY

- Exceeds ANSI standards for cutting performance and durability
- Suitable for cutting aluminium, sheet UPVC, wire mesh, leather, copper and plastic
- Serrated cutting edges prevent slippage when cutting
- Made from forged alloy steel for strength and durability
- Twin spiral spring for increased longevity
- Automatic unblocking of the lock/seal by simple pressure
- Permanent identification plate for the direction of cutting
- Chrome plated nuts and bolts
- Toothed blades favouring the holding of the sheet metal during cutting
- Cuts up to 18 gauge mild steel 0.7 to 1.2mm

STANLEY	Length in mm			
2-14-563	250	X	6	3253562145635

SOCKETS, SPAN

SCREWDRIVERS AND WRENCHES

THE PRO'S ADVICE

JOHN DAVIES
CARPET FITTER

THE RIGHT SOCKETRY FOR THE JOB

SOCKETS

Sockets are available in either hex (6 points) or bi-hex (12 points). The bi-hex socket provides greater access when the nut is in a hard to reach position. The hex socket, although with reduced angular accessibility, tends to be able to withstand heavier duty use.

Maxi Drive profile sockets are the most efficient and offer protection to both the fastener and the socket wall by taking the driving force away from the extreme corners of the nut where there is the greatest risk of damage.

Sockets are available in standard length, for most general-purpose applications and deep drive, which come into their own if you need to tighten a nut on longer screw studs.

RATCHETS

The turning force on the socket is imparted by the drive handle through a square recess forged into the end of the socket. The size of this recess varies depending on the size of the socket - 1/4" 3/8" or 1/2" square drive. Specific sets for each drive size are available, together with sets that combine drive sizes, which enable you to deal with fastenings from 4mm up to 32mm.

FatMax® and MicroTough™ ratchets offer the smoothest operation and allow access to fasteners in restricted areas. The smaller head is 20% - 30% smaller than standard ratchet heads and the fine tooth mechanism offers a 5° angle of engagement.

When working with oily hands it is important that the ratchet handle incorporates a quick socket release facility.

THE PRO'S ADVICE

JOHN DAVIES
CARPET FITTER

MAKE YOUR SOCKET SETS WORK HARDER

NUTS SHOULD TURN SMOOTHLY

To effectively use sockets you need to be sensitive to the way in which the nut turns on the bolt or screw stud. If the nut does not rotate smoothly check to see that the thread is not 'crossed' or if the thread size or type differs from the bolt.

TAKE CARE NOT TO OVER TIGHTEN

Run the nut up until finger tight and then apply the socket to finally tighten the nut. Under normal conditions do not be tempted to over tighten fastenings.

USE A TORQUE WRENCH FOR EXACT SPECIFICATIONS

If the torque required to complete the fastening needs to be specific for functional or safety reasons you should use a torque wrench.

USE THE RIGHT SIZE SOCKET

Even though the socket may locate on a nut that is slightly smaller the result may well be that the corners of the fastener will be deformed and make future removal difficult. The size of the ratchet handle is also carefully matched to a given set of socket sizes so that damage to the fastening is minimised. Whenever possible pull the ratchet handle towards you for better control.

LOCKING EXTENSION BAR

If you need to work on a fastener beyond your normal reach a locking extension bar will enable you to reach the nut without the risk of leaving the socket embedded in the machinery or engine compartment.

THE PRO'S ADVICE

JOHN DAVIES
CARPET FITTER

THE RIGHT WRENCH FOR THE JOB

COMBINATION SPANNERS

These combine in a single tool an open-ended jaw and a ring, both have the same dimension. The open-ended jaw is offset by 15° which enables the operator to turn any nut provided there is even a very small amount of access. The Bi-Hex (12 point) Ring end is also cranked at 15° from the horizontal, which enables you to grip the handle without risking injury to the knuckles.

COMBINATION SPANNER WITH RATCHETING RING END

A very useful specialist set of 6 spanners with the benefit of a ring end which ratchets with a 5° angle of engagement so that you can work in very restricted spaces and have the added advantage of an open ended end profile to work on fastenings that do not have 360° access as occurs on pipe work.

OPEN-ENDED SPANNERS

Both ends of these spanners are open with the heads set at 15°. The open-ended format is ideal for working on pipelines where only side access is possible. Select slim open-ended jaws to give greater accessibility within the thickness of the fastener.

ACCELERATOR COMBINATION SPANNER

The open-end part of the tool incorporates an innovative jaw form which enables the user to engage and disengage without removing the spanner from the nut.

ADJUSTABLE WRENCH

This must be used carefully and sparingly if damage to the fastener is to be avoided, but it is still a very useful item for any toolkit.

THE PRO'S ADVICE

JOHN DAVIES
CARPET FITTER

MAKE YOUR WRENCH WORK HARDER

COMBINATION WRENCHES

The open-ended jaws of a spanner are for use where access is restricted or when fasteners are in line as in pipework. Use the ring-end of a spanner for initial loosening and final tightening, where access is available, because it offers maximum strength and grip to reduce the risk of damage to the nut.

NEVER USE EXCESSIVE FORCE

When freeing a 'frozen' or 'rusted on' nut never use a hammer or extend the length of the spanner by using a piece of pipe; you will damage both the spanner and the fastener, instead use a lubricating oil.

PULL TOWARDS YOU WHEREVER POSSIBLE

Whether tightening or freeing off a fastening you can apply more power and control by pulling the spanner toward you and if it accidentally slipped off the nut there is less risk of injury.

ADJUSTABLE WRENCHES

For best performance from an adjustable wrench avoid selecting an oversized wrench for the fastener. Close the jaws of the wrench onto the flats of the nut and then gently move the wrench forward and back at the same time further tightening the adjusting knurled wheel until the fit to the nut is without movement; this will minimise damage to the fastener. Always rotate so that the force is directed toward the fixed jaw.

SAFETY

- Never use a hammer for additional leverage
- Don't use open-ended spanners or adjustable wrenches to free off a 'frozen' nut or to finally tighten a nut; use a ring spanner instead.
- Keep spanners free from oil to prevent slippage

SOCKET SETS AND ACCESSORIES

1/4" SQUARE DRIVE 35 PIECE SET

SPANNERS & WRENCHES

SET OF MAXI DRIVE PLUS COMBINATION SPANNERS

STANLEY

- Fully forged from chrome vanadium steel to ISO 3318 and DIN 3113 standards of accuracy and performance
- Nickel chrome plating protects against corrosion
- Slim pattern combines maximum strength with optimum accessibility
- Maxi Drive open ended jaw shape maintains grip on fastener with only slight rotational pressure
- Bi-hex 12 point ring with precisely broached
- Maxi Drive profile to increase the grip by up to four times
- Improved grip even on damaged nuts
- Polished head with satin finish to the handle
- Both the open ended head and the ring are angled at 15° for optimum accessibility ISO 3318 DIN 3113
- Nylon tool roll

HEX KEY SETS

FATMAX® LOCKING HEX-KEY SET

STANLEY
FATMAX

- Lock In Place feature to lock down keys and prevents unwanted movement of the Handle in Use - this is an Industry First
- Convenient "Button Lock" releases Hex Keys for secure and easy change from moving to locked
- Ergonomic handle for better grip allowing application of more torque by the user
- Extra long keys give easy access for recessed bolts
- Hex Keys lock into 3 positions; 90°, 135°, 180° for flexibility and ultimate access in tight spaces
- Metric, Standard American English & TORX Versions available to cover maximum range of applications

27 PIECE FATMAX® RATCHETING T-HANDLE SET

STANLEY
FATMAX

- Ratcheting Mechanism – Industry first for T-Handle. This speeds up the application as you can keep the key in the fastener while returning tool to the starting position
- Heavy Duty Ergonomic Handle – More robust and lasts longer in tough worksite conditions.
- Removable 1/4" drive key sizes fit into ratcheting handle - this means the user only needs one set.
- Compact and sturdy carrying case – safe storage of the kit and less chance of leaving a key behind on site
- Removable side bits for improved torque
- Drive will fit all 1/4" sizes (most common drive)
- Set includes: Nut Drivers, Socket Adapters, Long and Short Keys (Phillips, Pozi, Torx, Hex & Slotted)

THE PRO'S ADVICE

JOHN DAVIES
CARPET FITTER

THE RIGHT FASTENER FOR THE JOB

STAPLERS AND TACKERS

TIP 1 Choose the best staple type for the job. If you want to remove it later select the shortest that is suitable, if it is to be permanent select a longer staple. Set the power to hi or lo setting and test on a scrap piece.

TIP 2 If the staples are to be visible it is good practice to try to keep them in alignment and an equal distance apart – for accurate spacing it's a good idea to make a gauge.

TIP 3 If you are stapling fragile materials that have a distinct structure like wood veneer, always position the staple across the grain for greater strength. With some thin materials, even on low power, the staple may tend to cut through and become ineffective. Change to a broad crown staple or add a piece of stronger material between the staple crown and the work piece.

TIP 4 When work is completed fire off one final staple and hold the handle in the closed position and place the wire loop over the plastic hook on the handle to hold the handle in the closed position for storage.

DUAL MELT GLUE GUNS

TIP 1 Be sure to select the best heat setting for the job. Wood, plastics and metals respond best to a high temperature setting while more delicate materials such as card, paper and fabric bond better on low heat. If the materials have a tendency to absorb heat rapidly, a higher setting ensures that the glue stays fluid long enough for the parts to be positioned accurately.

TIP 2 When in use always stand the gun on a piece of scrap material - even with great care the hot glue will drip.

TIP 3 Test the glue by squeezing gently, aim to produce a fine and consistent line of glue - squeeze too hard and it will all appear in a single blob.

TIP 4 Do not attempt to apply glue to a very large area as it will cease to be workable after about 30 seconds.

TIP 5 Once glue has been applied hold the two pieces for about 30 seconds, by which time a strong bond will have formed.

TIP 6 As soon as the glue stick disappears into the heating chamber insert another to maintain a continuous flow of glue.

HAND RIVETERS

TIP 1 Assess the length, diameter and type of rivet required dependent on material type, thickness and final application (visual or functional). As a rule of thumb the rivet should be one and a half times longer than the combined thickness of the materials being joined.

TIP 2 Clamp the two sheets together and drill through both at the same time, removing any burrs with a fine file. Test suitability before starting on the finished material.

TIP 3 Insert the rivet and ensure that it is seated firmly onto the outer surface. If the materials to be joined may be damaged by the force of the rivet closing, place a suitably sized washer over the rivet shank to spread the pressure and create a stronger join.

TIP 4 Fit the correct size of nose-piece to the riveter and place over the rivet mandrel, pushing it up to the head of the rivet. Squeeze the handles together for the first pull, maintaining pressure on the nose of the riveter at all times. Open the handles and press the nose down to the rivet a second time, squeezing the handles together again, until the steel mandrel snaps just below the finished rivet.

DRYWALL CHAMFERING TOOL AN EDGE ON THE COMPETITION

First class fit and finish is the aim for any drywaller. And the new chamfering tool has been designed to deliver. That's why we built it with a moulded handgrip for added comfort and a fully adjustable carbide blade that stays sharper 5 times longer than a normal blade. So you get a perfectly bevelled edge, every time.

DRYWALL TOOLS

T-SQUARE METRIC

STANLEY

- Easy to read black markings
- Notched head for cutting a 4" board in one swoop
- 2" blade to cut both sides of an outlet box without moving square
- Durable blade springs straight no matter how you flex
- Blade measures up to 48", head measures 1" - 6" on short & 2" to 16" on long end
- Markings in inches and eighths
- Standard T-square with 1/2" lip

STANLEY	Length in cm

TOOL STO

RAGE

THE CANTILEVER TOOLBOX A PLACE FOR EVERYTHING

Working closely with pro tradesmen, we know that having the right tools to hand makes the job quicker and easier. But small parts and accessories can easily be lost in the bottom of the box. With this popular cantilever design, everything is in sight so it's easier to grab the right tool or fixing - just when you need it. They also told us that keeping tools free from damage is crucial. So this box has been developed to not only be tough and strong but also waterproof – a world first for cantilever tool storage.
